Subject: Value of heat squad

Hello to all it may concerns,

I'm writing to tell you the value of heat squad in my opinion. Heat squad came and did an energy audit on our home this past fall. A service we never would have been able to purchase on our own. Not only do they help point out areas for energy improvements that will save money; they noticed areas with our old woodstove installation that was dangerous, and has helped is make our home safer! The fact that it helps save the environment is an additional perk. Now that we know what we need to work on we also have been given assistance in figuring out how to achieve achieve and prioritize these improvements! Our house was exchanging air over 30 times a day. Substantially more then adverage!Winters can be cold without enough insulation, and so may drafts! We now know how to prioritize projects to imprive our comfort of living!

Please consider the immense value of this program to families like mine, and provide heat squad with 1.25 million in one time money so they can expand their incredible service state wide!

Warm regards,
The Corron family
