

AGENCY OF DIGITAL SERVICES

SFY2020 Budget Book

Working together with our State Partners to deliver simple and intuitive technology solutions
resulting in the improvement of the lives of the Citizens of Vermont

John Quinn, PMP, CIO & ADS Secretary

Kate Slocum, ADS CFO

Agency of Digital Services

1 Executive Summary

The Mission of the Agency of Digital Services is to work together with our partners in state government to deliver simple and intuitive technology solutions that improve the lives of the citizens of Vermont.

Our Vision is to make government services secure and easily accessible to all people doing business and interacting with the State of Vermont. The agency will also manage strategic investments in technology and manage the timing and pace of digital government enhancements.

In Alignment with Governor Scott's Priorities --- the Agency of Digital Services identifies the following four goals:

1. By 2020, ADS will improve Vermonters' experience with government interactions by increasing online interaction
2. By 2020, ADS will centralize the project management function across the Executive branch of State government
3. By 2021, ADS will increase accuracy of reporting and support creation of a comprehensive Executive Branch IT budget that focuses on cost/benefit.
4. By 2021, ADS will reduce likelihood of unauthorized access and misuse of Vermont data by raising employee and citizen awareness of risks in cyberspace and continuously defending the state data network.

2 Executive Order

The creation of the Agency of Digital Services allows for restructuring by centralizing critical capabilities for procurement, decision making, and operations.

The Executive Order outlines in detail what the Agency of Digital Services is expected to achieve over time.

1. Improved coordination of technology procurements;
2. Improved project management practices and standards;
3. Improved communication among State agency and department technology resources;
4. Improved IT governance
5. Utilization of technology skills and resources across departments for the benefit of all agencies and departments;
6. A comprehensive understanding of IT Spending;
7. Support of results based accountability;
8. Realignment of IT resources with State priorities

Cost of Service Allocation Techniques (Allocation vs Demand):

In order for us to do this we need resources which translates into funding. In conjunction with Finance & Management we came to the conclusion an Internal Service Fund (ISF) model would be in the best interest of the state. The nature of an internal service fund requires allocation of the costs through the VISION Billing Module. This fund is managed by the Agency of Digital Services (ADS) and bills for services provided via five payment mechanisms: ADS Allocation, Service Level Agreement (“SLA”), Telephony/VOIP Charges, Quarterly Timesheet Billing, and Bespoke Charges.

How do we distribute our costs?

- ADS Allocation
- ADS Demand SLA (Hosting, Enterprise Application Support, Enterprise Licensing)
- ADS Demand Timesheets
- Demand Telephone/Collaboration Billing (Cost Per line + Markup for People and Non-People)
- Demand Bespoke Charges (Billed back as order is placed and paid by ADS - on a cash basis - on a 1:1 for basis)

Allocation: Annually, the allocation is calculated for each department by spreading IT costs for shared services across state government based on the number of positions in each budgeted appropriation. Charges include Software, Hardware, People Costs (with respective overhead), Contractual Services, and the Connectivity with a FY20 Allocation of \$11.5M.

- | | |
|---|---|
| <ul style="list-style-type: none"> • Internet and other network connectivity • Video Conferencing (Skype for Business) • Mobile Device Management • File storage • Desktop/Laptop Windows operating systems • Service Desk • Vermont.gov management • Technology Contracting and Procurement support • eSignature Software | <ul style="list-style-type: none"> • Firewall, VPN and secure certificate services, support and maintenance • Internet border intrusion detection and prevention • Incident handling consultation and facilitation • Enterprise Project Management Office (EPMO) administration/Legislative Reporting • Penetration testing and vulnerability assessment • Staff involved with Security, IT Service Desk, IT Finance & Administration, GIS Professionals and Data Network professionals |
|---|---|

Demand: Demand services are budgeted and billed for with the assumption the benefit outweighs the cost to assign these services more specifically to customers rather than the allocation methodology described above.

SLA: Many business units purchase specific services from ADS and are billed for what they consume under the SLA Billing Model. This billing is estimated annually based on a prior year reconciliation of actual costs and consumption against planned budget and known changes specific to the department’s need or request. The following services are found within the SLA model.

- Telecom ACD
- Private Cloud
- Desktop Support
- Mainframe
- Enterprise Application Services
- GoToAssist Licenses
- Department Specific Security Services
- ERP Technical Services
- Enterprise Application Licenses e.g. Adobe, Microsoft
- Enterprise Application Support

Timesheet: For project specific staff resources, ADS bills out to its customers based on a Federally approved rate.

Staff which are classified as follows are captured within this rate structure:

- Enterprise Project Management, Enterprise Architecture, Security, are billed out at \$88/hour
 - Non-Enterprise Application Support are billed out at a rate of \$84 per hour These rates are calculated using currently budgeted costs divided by an estimate of hours available (1412) to bill during the fiscal year. The inputs to the rate include 3 items:

We take total hours available in a year

- Total Hours (2080) and deduct sick, leave, vacancy savings, training and staff meetings

The Estimated salary and benefits from the budgeting system (Vantage)

- Salaries & Fringe Numbers

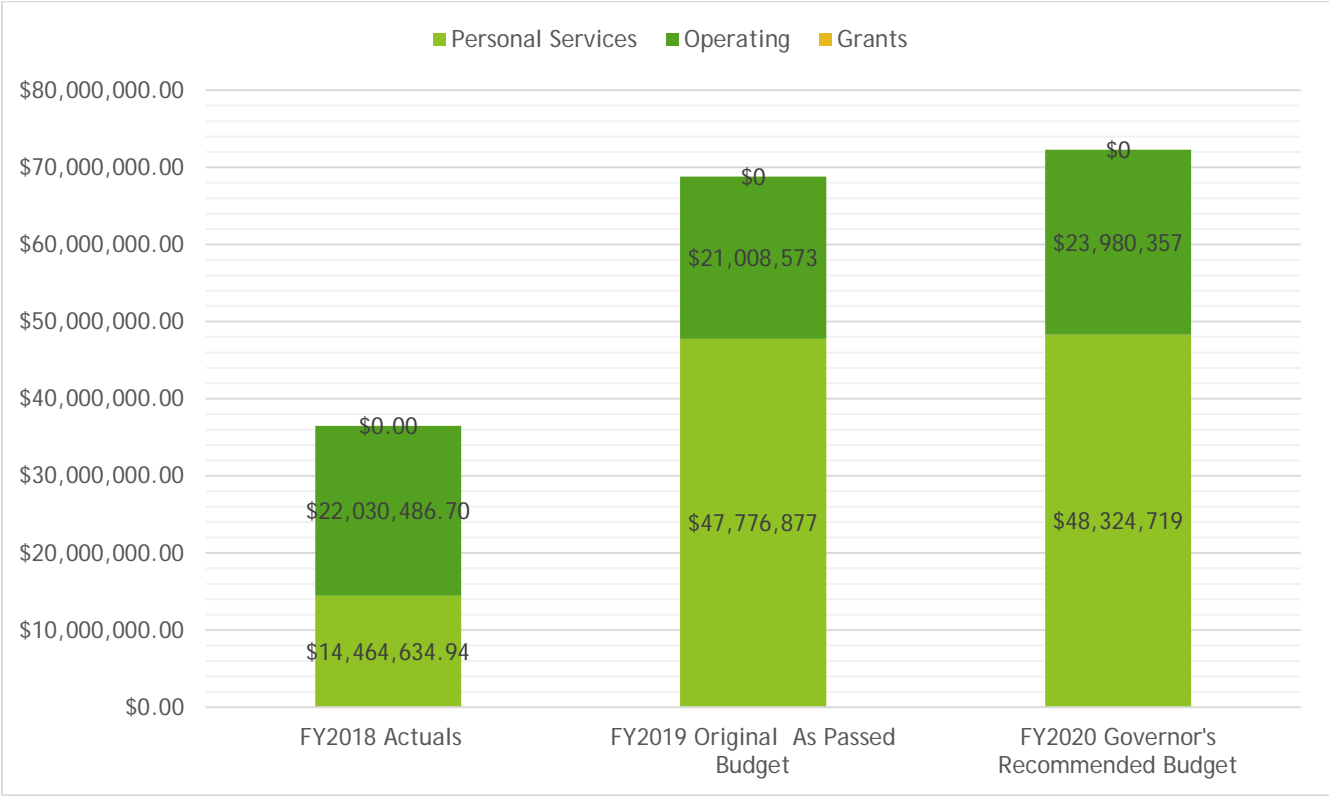

The Indirect Costs associated with the Staff assigned to the ADS Timesheets

- Indirect & Overhead

Telephony: Telephony/Collaboration/VoIP: The telephony/collaboration rate is established by statute for the analog/centrex lines by taking the cost per lines and charging a markup of 11.5% for the amounts paid to vendors whom we paid for the service. The VOIP rates are established in conjunction with Finance & Management and are currently across 3 service options (Standard, Foundation, and Essential) that are dependent on the phone type on the users work station. These rates are established to charge the cost ADS pays to the vendor with a markup that covers the implementation costs of the VOIP project, replacement cycle for the phones, staff time to support the service, and any ancillary software, hardware, and contractual services.

Bespoke Charges: Certain costs are required to be billed back on a [bespoke](#) basis (Hardware and other end-user devices, Software, Independent reviews, other contractual services, specific training related to projects/systems, hardware outside the SLA charges, Wireless Access Points, and telephony equipment associated with ACD).

The chart below is meant to visualize the change from FY18 Actuals to FY19 As Passed to FY20 As Proposed

Observations:

- The key driver of the FY20 increase in spending authority is the attributable needed investments in Cyber Security as well as an increase to Fee for Space for staff which have been assumed by ADS as part of the consolidation of IT professionals which occurred in FY19.

ADS Highlights and Successes

A partnership has been established between the State of Vermont and the Norwich University Applied Research Institute (NUARI) to establish a 24/7 Security Operations Center capability.

Additionally, we have begun collaborating with stakeholders from both the Department of Homeland Security (DHS)'s Intelligence and Analysis organization and their newly established Cybersecurity and Infrastructure Security Agency, as well as the Federal Bureau of Investigation's Cyber Task Force. In addition to these federal partnerships, ADS has collaborated with the Multi-State Information Sharing and Analysis Center (MS-ISAC) program.

ADS successfully outsourced the State's primary mainframe system. This system provides mainframe processing and data capabilities to State Agencies. Mainframe operations now take place on the outsource vendor's hardware, with software licensed by the vendor, other software licensed by the state but maintained by the vendor, all operating staff and support staff being employees of the vendor and located at the vendor's facilities.

Continually improving communication by updating the ADS website in order to better serve the needs of our partners.

Bi-weekly all-agency online conferences covering news across ADS, deep dives on topics crowd-sourced from ADS staff, and highlighting division and program work.

A monthly newsletter communicating items of interest and news, clarifying operational protocols, and messages from Leadership.

The Procurement Advisory Team (PAT) was created to expedite and thoroughly vet information technology (IT) procurement activity. Project procurements are reviewed by a panel of experts including program leaders, security and system professionals, procurement and legal experts and the Chief Information Officer's (CIO's) staff. This process has reduced cycle review time for contract review and signing from months to weeks to currently nine days and has modified procurements that don't align with strategy. In CY 2018, 283 engagements were made with the PAT team.

Governor Security Initiative

The State of Vermont, like other businesses or organizations, faces evolving cyber-security threats. Some of the main threats we see are viruses, malware, spam, phishing, ransomware, denial of service (DoS) and network intrusion attempts. To combat the rise of cyber threats to the State of Vermont, the VT Security Operations Center (SOC) is a proactive initiative developed and coordinated by the Vermont Agency of Digital Services and strategic partners to mitigate cybersecurity risks among state entities. In Fy19, ADS was about to partner successfully with NUARI under this initiative. We are requesting 1.2M k in spending authority to fund the second year of this initiative.

ADS RBA Performance Indicators:

Since becoming an agency, ADS has developed a performance management program that ensures that leadership and operations alike understands if we are making progress towards our goals.

Data-driven decision making processes have allowed ADS to recognize challenges across the State and allocate available resources in a manner that mitigates issues before they become crisis.

The robust approach to measuring progress has been an important ingredient of the early successes the Agency has achieved, including being ahead of schedule on some of the strategic goals we established for 2020.

EG: 8% increase in online transactions from 2017-18 (target 10% by 2020).

Participating in the Programmatic Performance Based Budgeting program. (Numbers below as reported)

Performance Measure	2015	2016	2017	2018
Email Availability	99%	99%	99.99%	99.99%
Customer Service Satisfaction	94%	93%	97%	97%
Data Center Availability	95%	99%	99%	99%
