

Our **vision** for career technical education is that all Vermont learners attain their post-secondary goals by having access to career and technical education systems that are equitable, efficient, integrated and collaborative.

We will achieve this by:

Goal: Supporting only high-quality, rigorous, aligned CTE career pathway programs that are informed by available state, New England regional, and national labor market data.

Goal: Engaging industry as a full partner in the creation, validation and maintenance of CTE programs.

A partner as defined here refers to business/industry as an owner of the success or failure of the system to produce individuals with highly valued skill sets.

Goal: Developing and implementing career advisement systems that support career exploration and that allow all learners to be successful in pathways of interest.

Goal: Supporting collaboration among systems and promoting coordination between systems as a means of ensuring equity and of providing students with a high-quality experience.

Goal: Improve the public perception of CTE.
