#### Note:

Are Client Counts Unduplicated?

Duplicated between Hospitals and Community

**Number of States with Unduplicated Counts** 

43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2016

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

#### **State Notes:**

Table 2a

Age None Gender None

Race In Vermont, a single race code is used for Asian/Native Hawaiian/Pacific Islander. Typically these clients are of Asian origin.

Overall Counts are based on a client file that includes all CMH clients and State Hospital clients for FY2016. A small number of individuals

may be counted more than once due to movement among community programs or movement between hospitals and community.

Table 2b

Age None Gender None

Race In Vermont, a single race code is used for Asian/Native Hawaiian/Pacific Islander. Typically these clients are of Asian origin.

Overall Counts are based on a client file that includes all CMH clients and State Hospital clients for FY2016. A small number of individuals may be counted more than once due to movement among community programs or movement between hospitals and community.

#### Note:

This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2016

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

#### **State Notes:**

Table 14a

Age None Gender None

Race In Vermont, a single race code is used for Asian/Native Hawaiian/Pacific Islander. Typically these clients are of Asian origin.

Overall Counts are based on a client file that includes all CMH clients and State Hospital clients for FY2017. A small number of individuals

may be counted more than once due to movement among community programs or movement between hospitals and community.

Table 14b

Age SED data not available due to change in DSMV definitions.

Gender None

Race In Vermont, a single race code is used for Asian/Native Hawaiian/Pacific Islander. Typically these clients are of Asian origin.

Overall Counts are based on a client file that includes all CMH clients and State Hospital clients for FY2017. A small number of individuals

may be counted more than once due to movement among community programs or movement between hospitals and community.

# Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2017

Vermont Reporting Period: 7/1/2016 To: 6/30/2017

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	18.8%	72.0%	71.0%	54
Percent of Children served through the SMHA who meet the Federal definition for SED	42.2%	70.9%	68.0%	54

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	23.3%	25.4%	23.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	-	6.2%	4.0%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	31.1%	23.3%	21.0%	53
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	-	5.1%	3.0%	53

#### Note

This table uses data from URS Table 12.

#### How are the number of clients with co-occurring disorders counted and calculated?

Co-occurring disorders include clients who have a DSM substance abuse diagnosis (either ICD-9 or ICD-10) and a DSM mental health diagnosis who also meet the Federal definition of SMI.

#### **State Notes**

Percentage of children/adolescents meeting Federal definition of SED is based on estimation as the definition of SED has changed in DSM5. Other SED data not available.

Forensics included in "non forensic" data? No

#### Note:

US totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

#### State Notes:

In Vermont, a single race code is used for Asian/Native Hawaiian/Pacific Islander. Typically these clients are of Asian origin. Also see General Comments.

# **General Notes FY 2017**

# Vermont

URS Table Number	General Notes
3	Counts are based on a client file that includes all CMH clients, State Hospital clients, and involuntary inpatient clients for FY2017. A small number of individuals may be counted more than once due to movement among community programs or movement between hospitals and community.
6	For Residential Tx Centers for Children 0-17, we were unable to obtain this data for FY2017.
12	The data for SED are unavailable for FY2017 due to changes in the DSM5. Values for SED for FY2016 were estimated based on previous years.
15A	Databases for individuals served at residential treatment centers and at other psychiatric inpatient facilities do not contain elements necessary to identify clients as SMI or SED. Defintiion of SED changed in DSM5.
15A	Data not available for youth in Residential Treatment Centers for FY2017.
16A	CSC and FEP data are not available
