

To whom this may concern,

Regarding: This House Bill 57, which would set unrestricted abortion in legal stone law and deny any individual rights for human fetus throughout pregnancy.
I am a Vermonter who believes in the value of life. When one tries to devalue human life at its beginning opens doors to continual devaluing. By stating anyone can kill life from a mother at any time takes away life from others. A human being has no right to say to another you have no value. I DO NOT want to be part of state known for death of a helpless child those whom in this bill is calling a fetus!!! We talk about our state; come enjoy the maple syrup, the beautiful mountains, and the seasons. Enjoy our colorful foliage. Come spend your money here oh by the way if you're pregnant we do not value the life you're carrying. Someone valued your life that is why your here today. By killing an unborn child it will not matter how beautiful your state is or what it provides. It says to others come devalue life with us!!! Vermont should be a state that fights for life. There is history here in our state where people valued life when others did not!!! They would even hide people from whom people perceived had no value!! They fought for their life. I am a women who fought for my 3 children lives and I have lost life to. I was a high risk carrier. I am thankful to all those who fought with me to provide life to them. This is a time in history where Vermonters could stand and say we value human life come join us. That is when our state will be truly attractive!! A life giving state!! You have been given the opportunity to live, please choose your vote to stand for life!! Life produces life!!
