

Dear House Committees on Human Services and Judiciary,

I am a Vermont resident and I feel that H.57 is a horrific piece of legislation. There is no reason that a infant would need to be eliminated in the 3rd trimester other than convenience for the mother. It has been proven that unborn infants are alive and can feel pain. If a human is pronounced dead when their heart stops, why is it that a human is not pronounced alive when their heart starts. Life starts during the first trimester. Please do not pass this terrible piece of legislation that will murder the lives of innocent humans that are unable to defend themselves.

Thank you for your time,
Allison Levasseur
