

To whom it may concern:

I am writing to express my disagreement and disdain with the H.57 bill. It is abhorrent to think of all the lives that are being aborted and how this bill will further allow the genocide of babies to happen. It is wrong to discriminate against a human being based on their size and development and that is just what this bill is allowing by not giving these babies any rights. I am pleading with Vermont legislatures to consider the magnitude and impact H.57 would have in killing innocent lives. These human beings cannot speak for themselves and need someone to defend their cause. I am writing this as a human who was once a fetus in my mother's womb and anyone who is reading or listening to my testification was once a fetus in their own mother's womb. Imagine if you would not have been given any rights and your mother decided it best to terminate your life. Who are we to choose who deserves to live? I beg you to not allow the H.57 bill to pass. Innocent blood hangs in the balance.

Sincerely,

Ashlee Ickes
Vernon, VT
