

My name is Samara Caouette I AM AGAINST bill H.57 and I am disgusted to be a Vermonter today. I had no idea you could murder your child in this state up until birth until the inhumane bill was passed in NY last week and can't believe it is allowed for any reason. Any Doctor who is not a shill for planned parenthood can tell you they can induce or perform an emergency c- section in the second and third trimester. I cannot see how anyone who supports this can even sleep at night. I am sick of seeing Planned Parenthood pushing murder on the citizens of this state (and country) and actually saw a fundraising ad on YouTube they put out last year for PP of NYC called protect our freedom to FCK. They were actually promoting Pedo in the description of their ad as sexual freedom, which has also been on their agenda I have since learned. These people are promoting child rape and they also have been filmed aiding child sex traffickers. And these are the people our government thinks has the best interest of women in mind? They are NOT. This bill leaves women more vulnerable than ever to abusers who can kill a child they are carrying, not be charged, and that mother will never have justice for the life that was taken from her. Abortion is the most barbaric form of murder in the history of the world and our state is promoting it. Maine has a law that states you cannot sell a live fetus. Vermont will allow that to happen with this bill by stripping the rights of a live fetus, or baby as most human beings would call the life growing in a mother's womb. Research now suggests babies feel pain at 8 weeks from conception certainly at 20 weeks and you people promote painful death right up, until and after birth. Make this illegal!! Protect babies that are born alive, don't murder them!! I can't believe these babies aren't even given anesthesia, which would not make the fact their lives are being taken in any way better, but we would not even do this to animals. People are saying Vermont is going to become the abortion capital of the world. Is that the image the citizens of this state want? I don't believe it is. The majority of people are against third trimester abortions, the Guttmacher institute says 80% of people do NOT agree with it and a separate study found 62% of people with pro choice views do not agree with abortions in the second trimester after 20 weeks. So why is our elected officials pushing the agenda of planned parenthood on us? I am a woman and I know it is not my "right" to take a life. It is not my fundamental right as it directly hurts another life. Give unborn children rights!!! They have the fundamental right to live. No one on the face of the Earth has the authority to take that away from them. I hope you people see that whatever terminology you use to make murder seem more socially acceptable, abortion is murder. Abortion ends a human life. A life that is valuable and separate from that of the mother's
