

I am opposed to H.57, the bill that gives unlimited restrictions on abortion.

Abortion is wrong!

By the 10th week of gestation in utero.. you have your own (in the WORLD), unique fingerprints. Before that a heartbeat! Our lives are unique from the womb! Your life and my life started in the womb! Not when we passed through a birth canal, and the plans for us and what we can accomplish are as unique as we, until the day we die. Im standing up for those still in the womb, not breathing air yet, but still very much alive! They are living humans! There is no medical reason to abort a living baby during the third trimester. C-sections are done all the time for preemies who go on to live beautiful, functional, happy, healthy lives! My family did foster care and adopted many kids through the years. Children are wanted, why should we allow a woman to murder a human for her own convenience/"selflove". Its selfishness! Not self love. Its murder. Its choosing self over what is right.

Please, please, please veto this bill! I implore you!

How are we different from the nazi's if we go along with this?

Sincerely,

Valerie Putnam
