

I am Barbara Orleck from Randolph who is blessed being the mother of 2 and the grandmother of 4 wonderful, beautiful children.

Children are gifts from God.

All lives begin at conception and they all matter.

God gave the right to life and no one, not even the potential mother has any right to destroy the baby that God has given.

It is a terrible wrong to have an abortion at any point of the child's development.

I can understand there may be reasons why a woman might make such a bad choice but no matter the reason the action is a sin, the consequences of which she will carry with her the rest of her life.

I cannot understand what evil must possess a woman to carry a child up to the time of delivery and then choose to destroy this perfect miracle of God.

It can only be something very evil for this to happen.

It is even more evil for an elected lawmaker to create a law that would allow such a killing.

What are they thinking?

What next?

A death culture law will lead to the legal killing of a child after birth when convenient for the parents.

How do you protect anyone from its reach?

By insuring that all humans, from the time of conception to natural death are protected to insure their God given rights to life, liberty and happiness.

I am so shocked that my two representatives Jay Hooper and Ben Jickling would sponsor this evil bill and I appeal to them to remove their name from it.
