

I wanted to follow up with you about the testimony this morning. On the ride back to South Burlington I reflected on the testimony and felt that the importance of persons who are subject to relief from abuse orders surrender their weapons when ordered to do so by the court was lost. The intent of the bill is one that law enforcement should support, removing guns from dangerous people posing an immediate threat, the process questions as to Search Warrants and work flow need refinement. Thanks again for your time and that of your committee.

Shawn
