PREVENTING FUTURE ABUSE
Survivors who work with advocates have lower risks of re-abuse, and are more connected to community supports.

98% of survivors served by Member Organizations of the Vermont Network in FY 2019 reported that as a result of the advocacy they received, they knew more about their rights and options.

SAFETY & WELLBEING

EARLIER ADVOCACY ↓ COSTS
Studies indicate that when advocates are present in the legal and medical proceedings following assault, victims fare better in both the short and long-term, experiencing less psychological distress, physical health struggles, sexual risk-taking behaviors, self-blame, guilt, and depression.
