FOR PEV CONTRIBUTIONS TO THE TRANSPORTATION FUND; REPORT			

(a) The Agency, in consultation with the
<u>Departments of Environmental Conservation</u>
and of Public Service and the State's electric
distribution utilities, shall design a pilot
program to collect a per-kilowatt hour (kWh)
fee from PEV operators at EVSE, without
regard to whether the EVSE is available to the
public, parallel to and independent of the
current framework of the gasoline and diesel
taxes established under 23 V.S.A. chapters 27
and 28.

(b) The Agency shall file a report with the House Committees on Energy and Technology, on Transportation, and on Ways and Means and Senate Committees on Natural Resources and Energy, on Finance, and on Transportation on or before November 15, 2021 detailing the elements of the pilot program including: a recommendation on the amount of the per-kWh fee and how the amount was determined; how the fee should be collected and transmitted to the Transportation Fund; how rate design or other means can be used to prevent PEV or EVSE operators from avoiding the fee; the role of the State's electric distribution utilities in the pilot program; a schedule for pilot program implementation; the availability of federal funding to support the pilot program; proposed legislation necessary to support the

pilot program; how pilot program elements		
may differ between EVSE available to the		
public and EVSE not available to the public;		
how pilot program elements may differ		
between EVSE that is separately metered and		
EVSE that is not separately metered; the		
anticipated costs to electric distribution		
utilities to administer the pilot program and to

(h) Class 2 Town Highway Roadway Program. There shall be an annual appropriation for grants to municipalities for resurfacing, rehabilitation, or reconstruction of paved or unpaved class 2 town highways. However, municipalities that have no State highways or class 1 town highways within their borders may use the grants for such activities with respect to both class 2 and class 3 town highways. Each fiscal year, the Agency shall approve qualifying projects with a total estimated State share cost of \$7.648,750.00 at a minimum as new grants. The Agency's proposed appropriation for the Program shall take into account the estimated amount of qualifying invoices submitted to the Agency with respect to project grants approved in prior years but not yet completed as well as with respect to new project grants to be approved in the fiscal year. In a given fiscal year, should expenditures in the Class 2 Town Highway Roadway Program exceed the amount appropriated, the Agency shall advise the Governor of the need to request a supplemental appropriation from the General Assembly to fund the additional project cost, provided that the Agency has previously committed to completing those projects. 	Sec. 21. USE OF POZZOLANS AS AN ALTERNATIVE TO PORTLAND CEMENT
	(a) Findings. The General Assembly find that:
	(1) Pozzolans, such as pulverized fuel ash (commonly known as "fly ash"), ground granulated blast-furnace slag, and silica fum can be used to partially replace a portion of the Portland Cement used in the production concrete.
	(2) Using pozzolans in the production of concrete for transportation infrastructure projects can typically reduce the use of Portland Cement by 40 to 50 percent.
	(3) Using pozzolans in a concrete mix design can:
	(A) reduce the carbon dioxide emissions associated with transportation infrastructure projects, such as bridges and sidewalks;

			(B) increase the compressive strength and durability of concrete; and
			(C) decrease construction costs.
			(4) Pozzolans cannot be used as a complete substitute for Portland Cement in a concrete mix design because they enhance and do not replace the cementitious properties of Portland Cement as it hydrates as part of the overall chemical reaction that binds and strengthens the concrete.
			(b) Use of Portland Cement. The Agency is encouraged to continue researching, testing, and wherever practicable, using pozzolans and alternatives to Portland Cement as part of the concrete mix designs for all transportation infrastructure projects.
