

1 * * * Net Metering at Electric Vehicle Supply Equipment * * *

2 Sec. 33. 30 V.S.A. § 8002(16) is amended to read:

3 (16) “Net metering system” means a plant for generation of electricity
4 that:

5 (A) is of no more than 500 kW capacity;

6 (B) operates in parallel with facilities of the electric distribution
7 system;

8 (C) is intended primarily to offset the customer’s own electricity
9 requirements and does not primarily supply electricity to electric vehicle
10 supply equipment, as defined in section 201 of this title, for the resale of
11 electricity to the public by the kWh or for other retail sales to the public,
12 including those based in whole or in part on a flat fee per charging session or a
13 time-based fee for occupying a parking space while using electric vehicle
14 supply equipment; and

15 (D)(i) employs a renewable energy source; or

16 (ii) is a qualified micro-combined heat and power system of 20
17 kW or fewer that meets the definition of combined heat and power in
18 subsection 8015(b) of this title and uses any fuel source that meets air quality
19 standards.
