

**Graham Campbell – Draft estimate**

**If the rate on dyed diesel fuel in H.439 (\$0.04 per gallon) were enacted and this exemption was included, the total cost of the exemption would be \$450,000.**

**If the rate on dyed diesel fuel stays the same as current law (\$0.02 per gallon), an exemption for dyed diesel fuel for farmers would cost \$225,000.**
