Subject: House Bill 513

Hello, I would like to air my concerns about the proposed implementation of 5g technology here in Vermont. There are many studies that have found that these frequencies are dangerous to our health, particularly children. I urge you to remove section 1&2 from bill h 513 because they allow 5G to be implemented under the cover of broadband expansion called "one touch make ready". I would also like to ask you to place a stay on the attachment of 5G antennas to poles and towers until it is PROVEN safe and reliable, including 4G antennas that can be upgraded to 5G via software. There are safe alternatives, fiber optics being the main one. Please consider preventing the implementation of 5G in Vermont. Our health and our children's health is at stake. Please take 15 minutes to watch this important video from a silicon valley engineer about the effects from wifi <https://youtu.be/F0NEaPTu9oI>.

Thank you, best regards, John LaRouche
