

Pam McCarthy, Vermont Family Network
Senate Appropriations Committee Advocates Hearing
4/16/2019

Good afternoon. Thank you for allowing me to speak with you today with regard to Children's Integrated Services. My name is Pam McCarthy, and I am the President and CEO of Vermont Family Network, a statewide organization that empowers and supports families of children with disabilities and special health care needs. I am also a member of the Vermont Coalition for Disability Rights and the Vermont Early Childhood Advocacy Alliance.

As one who has been personally involved in prevention and early intervention for over 30 years, and the CEO of the agency contracted by the state to provide Children's Integrated Services Early Intervention (CIS-EI) in Chittenden County, I am very concerned about the continuing lack of resources to support some of our state's most vulnerable children. At a time when the needs of our youngest learners are increasing, often due to the impacts of poverty, substance abuse, trauma, and other Adverse Childhood Experiences (ACEs), I believe it is essential to bolster early childhood services and supports that can make a huge difference, particularly when we are seeking to stabilize young children in their early learning environments and reduce the costs of special education in our schools.

H. 531 Restores the Governor's Proposed CIS Funding Cut for FY20

The Department for Children and Families' Child Development Division's CIS Director testified before the Senate Health and Welfare committee in February. She shared the attached data, strongly reinforcing advocates' concerns that CIS is gravely under-resourced, and as a result services that are proven to support young children's development are not getting to those who need--and are legally entitled to---them.

As you know, CIS has been level-funded for over 10 years, and the strain on the system is evident. Caseloads are increasing, as is family complexity. Recruiting and retaining excellent early care, health, and education professionals is challenging. These factors are combining in ways that jeopardize good outcomes for some of Vermont's most vulnerable children and families.

It is critical to support young children's development early and well, and the Administration and advocates agree that we need to shore up the early care, health, and education system to ensure bright futures for our youngest Vermonters. Providing the funding to make these services possible, however, is anything but assured.

Unfortunately, the Governor's Recommended FY20 budget included a cut to CIS funding, citing under-utilization of services as the reason. However, as CDD staff themselves shared in February, CIS service delivery is being interrupted because of a lack of funding – delayed services, staffing shortages, inadequate capacity, and a crisis-driven system are the specific indicators cited in their written testimony. What appears to be underutilization of this funding is actually a lack of capacity.

The House Human Services and Senate Health and Welfare Committees have heard our concerns, and we applaud the decision of these committees to reject this proposed cut. We fully support the language in H.531 that restores the funding, specifically for the purpose of increasing reimbursement rates to CIS providers. We hope that you will agree with this position, and that you will further refine the purposing of the funds, directing them to be spent on the CIS “bundle” where they can be applied for the greatest impact in each AHS District, given the particular needs and resources that can be leveraged in in different regions of Vermont.

CIS Program Details – Who we help, and why the system is failing them

CIS providers and child development champions believe that the Governor's budget recommendation to cut \$309,714 from CIS due to underutilization is shortsighted and uninformed. The specialized staff that provide CIS services – Speech-Language Pathologists (SLP's), Developmental Educators (DE's), Occupational Therapists (OT's), Physical Therapists (PT's), and Applied Behavioral Analysis (ABA) providers – are in limited supply, especially in the more remote regions of Vermont. Their compensation is often less than adequate to recruit and retain their much-needed skills. It's worth repeating: What appears to be underutilization of this funding is actually a lack of capacity.

CIS underfunding is also a legal issue. Children who have, or are at risk of developmental delays, under federal law are legally entitled to high quality, consistent services under Part C of the Individuals with Disabilities Education Act (IDEA). Very young children, for whom time is of the essence, are waiting for services to which they are entitled to by law in a timely way under IDEA and by Medicaid Early Periodic Screening, Diagnosis and Treatment (EPSDT) mandates.

Organizations like mine are frequently challenged by the lack of DE's, SLP's, OT's, PT's, and ABA providers. Sometimes this provider shortage is due to less than desirable reimbursement rates and lack of reimbursement for mileage, sometimes because specialty providers just don't exist in a region, or because they cannot meet the caseload demands, as is the case in Chittenden County. Here are a few examples from my organization's recent experiences with CIS:

- CIS is uniquely positioned to provide home visits that prevent child abuse and neglect, but level funding means that we can't provide a "therapeutic dose" to all our clients. Between FY16 and FY17, Chittenden County provided CIS Family Support to 15% more clients but with the same staff level. This meant we had to reduce the frequency of visits by Family Support workers.
- Level funding for CIS has forced Chittenden County to cut two full-time Family Support positions and 30% of our capacity to deliver Evidence Based Home Visiting, a primary strategy for addressing Adverse Childhood Experiences (ACEs) and helping families prepare their children for success in kindergarten.
- Chittenden County CIS providers may be asked to provide a greater contribution to the CIS contractor's admin fees in FY 20, which will mean further reductions in staff and further reduced capacity in direct services to children and families.
- For young children diagnosed with autism spectrum disorder (ASD), clinically and developmentally appropriate services are lacking statewide. In Chittenden County, we currently have eleven young children diagnosed with ASD, and seventeen who are suspected of having ASD. Some children have been waiting as long as 7 months for intensive services. Earlier intervention and support of the right kind, at the right time, in the right amount, for the right duration for children with this diagnosis has been shown to make an appreciable difference.
- Washington County notes that their one Occupational Therapist who makes home visits cannot see any new CIS clients until 2020.

These are just a few illustrations of the need for increased support for CIS, and why I support increased funding for CIS.

VFN appreciates that H. 531 as passed by the House would prevent the Governor's proposed cut to CIS for FY20. I would be remiss if I didn't encourage you to also consider increasing funding for the Children's Integrated Services bundle in the 12 CIS regions, given years of level funding and increasing family needs and complexities, not to mention the challenges in recruiting and retaining skilled CIS staff with decreased ability to adequately compensate them. It is important to address the community-identified needs of our most vulnerable children and their families, and to meet our IDEA and EPSDT obligations as a state.

If there is any ability to increase Vermont's investment in prevention and early intervention under CIS, it should be exercised, given our stated commitments to realizing the promise of every Vermont child.

Thank you for your time, and feel free to contact me if you need further information.

All my best,

Pam McCarthy
President/CEO, Vermont Family Network

CHILDREN'S INTEGRATED SERVICES (CIS)

TESTIMONY FOR SENATE HEALTH AND WELFARE COMMITTEE--FEBRUARY 7, 2019

Morgan Cole, MPP
Director, Children's Integrated Services
Department for Children and Families
Morgan.Cole@Vermont.gov

“The highest rate of return in early childhood development comes from investing as early as possible, from birth through age five, in disadvantaged families. Starting at age three or four is too little too late, as it fails to recognize that skills beget skills in a complementary and dynamic way. Efforts should focus on the first years for the greatest efficiency and effectiveness. The best investment is in quality early childhood development from birth to five for disadvantaged children and their families.”

—James J. Heckman, PhD, Nobel Prize Winner in Economics

CHILDREN'S INTEGRATED SERVICES

1. CIS Program Overview
2. Value and Purpose of CIS
3. Trends in Population Need
4. CIS Funding—Payment structures, methodology, and goals

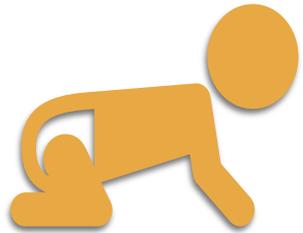

CIS OVERVIEW

- Research demonstrates investment in early childhood services improves short and long-term outcomes across multiple indicators and lowers the likelihood of more expensive, deeper-end system involvement
- CIS offers 4 core services to families of young children facing challenges—Early Intervention, Specialized Child Care, Early Childhood and Family Mental Health (ECFMH), and Home Visiting
- Professionals deliver services in the home or child care settings and emphasize building capacity of parents/caregivers to effectively support the child's health & development
- The model is family-centered and delivered by a multidisciplinary team, using an innovative payment model
- Population need for CIS services has increased significantly, while resources remain level
- Efforts are under way to examine and update the rate methodology to improve accuracy and equity

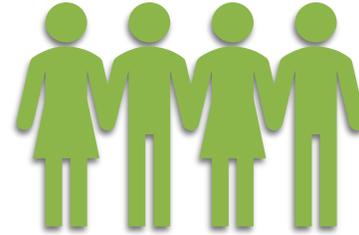

OVERVIEW OF CIS: SERVICE ARRAY

CIS OVERVIEW: POPULATION SERVED

**Primary Population:
Prenatal to 6 years**

**5400 Referrals Rec'd
7500 Clients Served
(SFY18)**

**Estimated 85%
Medicaid
Recipients**

**~50% Receive
Early Intervention
Services**

CIS OVERVIEW:
SYSTEM
STRUCTURES

CIS State Team: Staff in Waterbury provide program oversight and support

Fiscal Agent Contractor: A single agency in each region holds the CIS contract

Regional CIS Admin Team: A coalition of providers and partners governs regional CIS system and ensures service delivery

Local CIS Coordinators: An individual in each region coordinates partners, reporting, etc.

Regional Intake & Referral Meetings: Weekly meetings triage referrals and collaborate

VALUE AND PURPOSE OF THE CIS MODEL

- The upstream services provided by the CIS system utilize a two-generation approach for maximum impact
- Research demonstrates that quality interventions and supports for children ages 0-5 have among the highest return on investment across human services- *13% ROI for high-quality birth-5 programs*
- CIS uses multiple evidence-based practices with proven effectiveness in impacting outcomes in health, child maltreatment prevention, education, and economic well-being
- Services help to mitigate ACES and intergenerational trauma

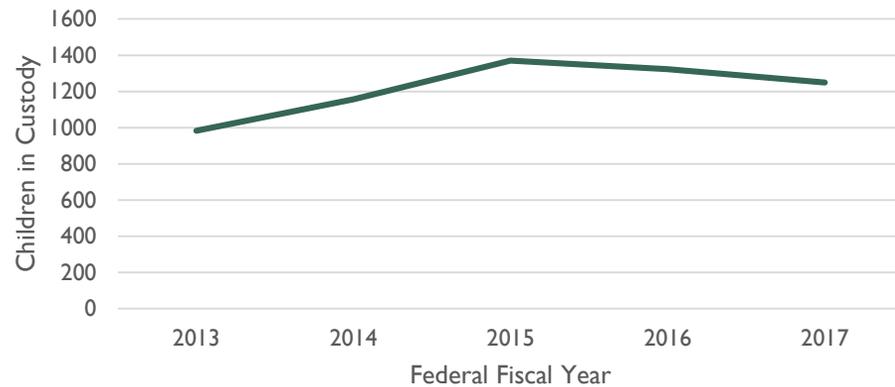

“We had a child that qualified for Early Intervention with global delays. When I started working with the family the child had zero words and was physically aggressive towards caregivers and unsafe with peers and unsupervised would climb up on the stove. Mom called him her “out of control monster.” Just last month he exited EI on his third birthday age appropriate in all areas. Mom was so thankful for for CIS services and said “he is totally a different kid now that he is using whole sentences, his aggression is way less.””

- CIS Developmental Educator

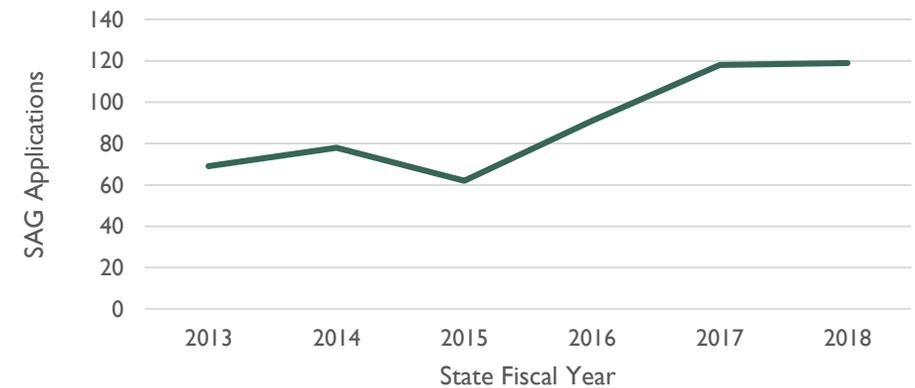

INCREASING CIS POPULATION NEED & CASE COMPLEXITY

Trends across multiple indicators demonstrate an increasing population need for CIS:

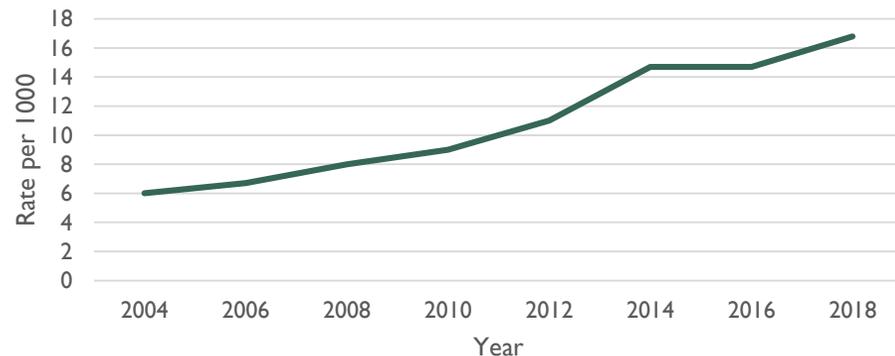

Children in DCF Custody

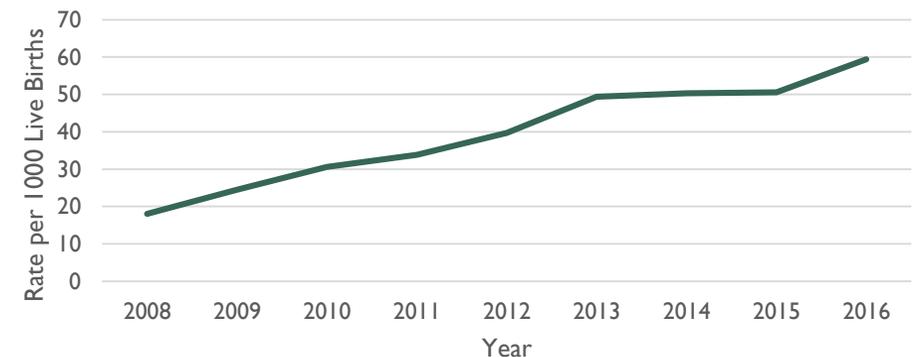

Special Accommodation Grants

Autism Prevalence (National)

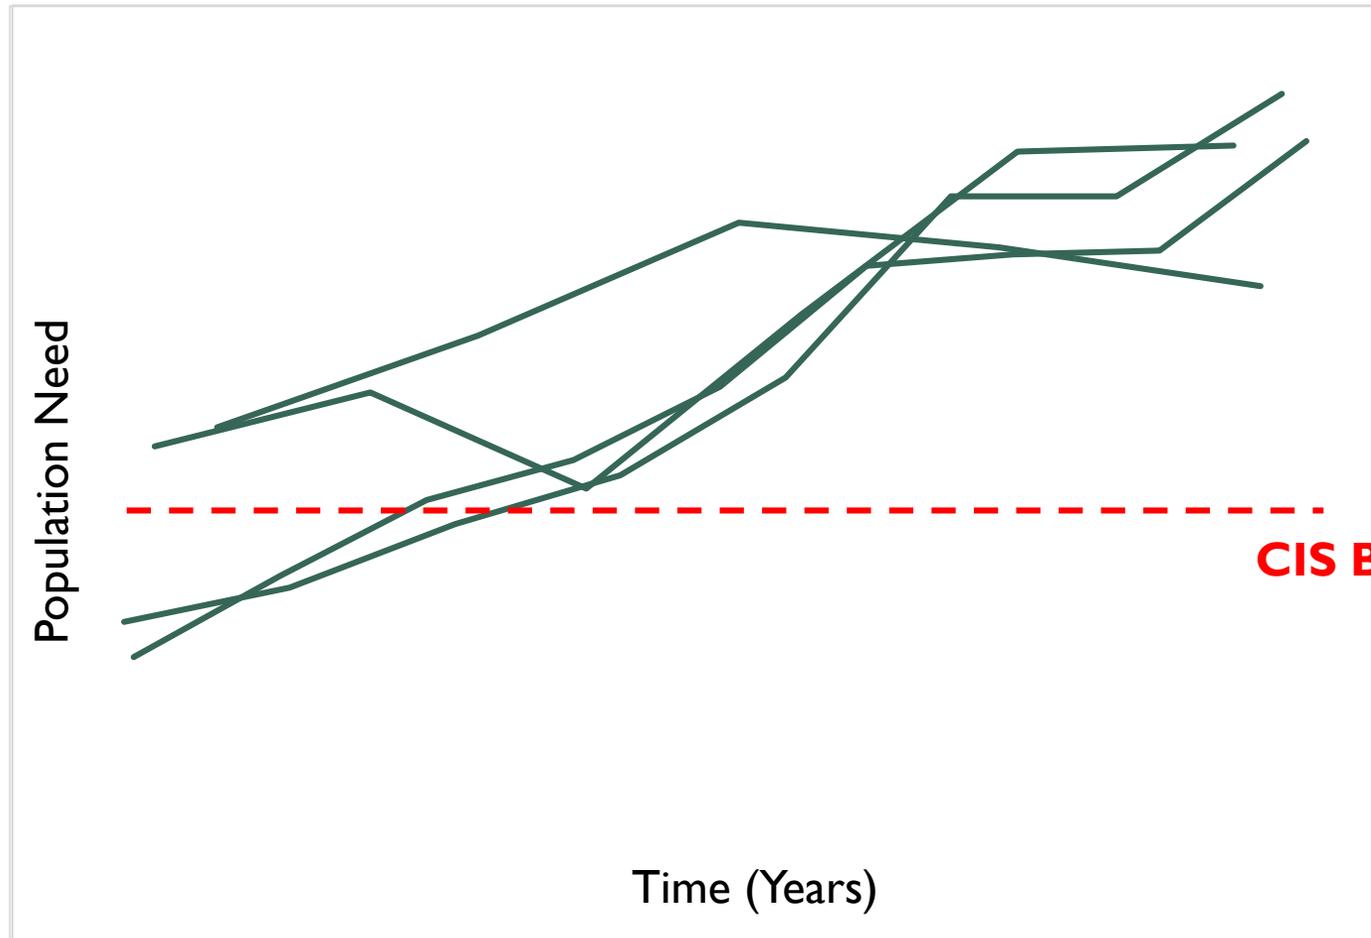

Infants Exposed to Opioids (VT)

CIS FUNDING: POPULATION NEED + BUDGET OVER TIME

Please note this visual is intended to demonstrate overall trend of increasing need and level funding, rather than exact figures

CIS Bundled Services Funding

CIS FUNDING: RESULTS OF RESOURCE CHALLENGES

Delayed Services: Timeliness indicators suffering, impacting federal compliance

Inadequate Capacity: Resources cannot keep up with increasing population need

Staffing Shortages: Significant challenges in staff recruitment and retention, low wages cited
64% of CIS staff have been with CIS for 5 years or less, up from 50% in 2016

Crisis-Driven: Reactive by necessity at a system level

SUCCESS DESPITE RESOURCE CHALLENGES

Families Achieving Goals

In SFY2018, more than 80% of CIS children and families achieved one or more goal before exit or annual review

Identifying EI Needs Sooner

The average age for initial referral to EI services has dropped steadily from 26 months in 2014 to 14 months in 2017

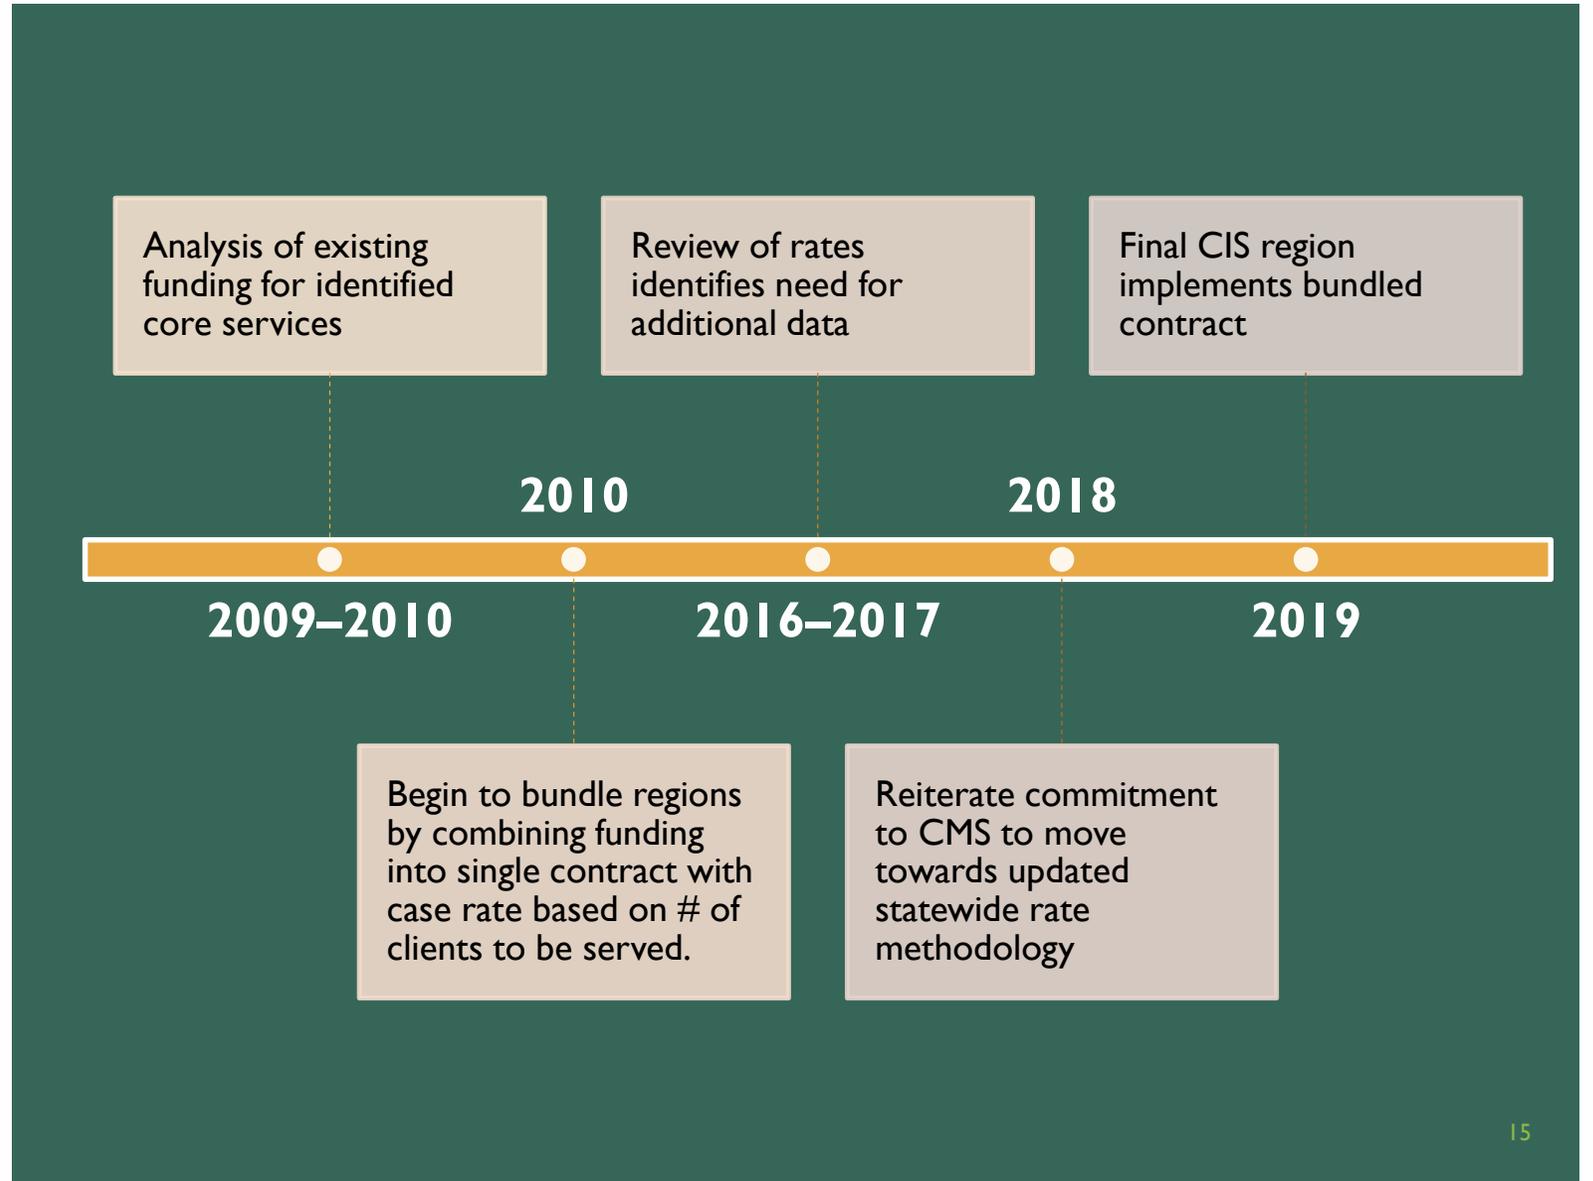

Strengthening Family Engagement

The number of families lost to follow up has consistently declined over the past 2 years

CIS FUNDING: SERVICE DELIVERY REIMBURSEMENT

Funding Mechanism	Annual Spending (approx.)	Funding Source
Bundled Contracts	\$9.2 million	~85% Medicaid, 15% General Fund
Non-bundled Services	\$3 million	Part C Grant, then GF (POLR)
SCC Transportation	\$800-900k	Temporary Assistance for Needy Families (TANF)

CIS FUNDING: TIMELINE OF RATE DEVELOPMENT, IMPLEMENTATION, & REVIEW

CIS FUNDING: BUNDLED RATE METHODOLOGY

- Each regional contract total is based on historical spending among services prior to bundle implementation
- Regional case rates were determined by contract total and a set monthly client count
 - Current monthly case rates range from \$498 to \$854, with a mean of \$676
- CIS Admin Teams allocate funding between services based on locally-determined methodology, community need, and provider capacity
- Contracted Fiscal Agent in each region bills for monthly case rate for children served by any CIS service, then reimburse service providers based upon local approach and subcontract agreements
- Reimbursement for bundled services from the State may not exceed contract total

CIS FUNDING:
PAYMENT
REFORM GOALS

Goals of CIS Payment Reform 2019-2020

1. Develop updated payment methodology to reflect current cost of service delivery and population need
2. Utilize methodology to implement statewide base rate with appropriate regional variation
