

Purpose: Together CCV and Vermont Tech seek to serve 1,000 Vermonters who have been impacted by the COVID-19 pandemic, either through layoffs, furloughs, reduced hours or due to being employed in an industry that has been severely affected. We will offer courses and workshops to either upskill affected Vermonters in their current industry or reskill Vermonters who desire a change in their career path for more economic stability.

Combined Budget: \$2,300,000

Community College of Vermont

CCV is deeply rooted in Vermont communities, providing students opportunities for academic and professional growth through flexible, innovative programs and exemplary support services. CCV will cultivate a rich network of partners through collaboration and workforce development to create vibrant and economically thriving Vermont communities.

Vermont Tech

Vermont Tech offers a unique learning experience in Vermont: focused, hands-on, applied learning taught by faculty who are experts in their field. The Office of Continuing Education and Workforce Development (CEWD) brings this style of education to a wide range of professions and professionals.

CEWD designs and delivers workforce education and training, including customized workshops, courses that lead to certifications, degree programs, and more. We serve healthcare facilities, state agencies, nonprofits, small businesses, manufacturers, service industries, educators, municipal government, builders and contractors, as well as those interested in gaining new life skills, a pathway to a degree or industry recognized credentials.

We have over [100 online](#) 3- 6 week courses on a variety of topics and can offer just in time customized course as well.

GREEN/TRADES

BPI PROFESSIONAL CERTIFICATE TRAINING Building Performance Institute (BPI) certifications demonstrate a level of knowledge and expertise that potential clients look for and can help you land new work. In addition, many federal, state, and utility initiatives require BPI certifications for contractor participation in energy efficiency projects. Vermont Tech offers three BPI certification trainings: Building Analyst, Envelope Professional, and Heating. Cost - \$2650.00 two weeks

SOLAR PV Installer This five-day introductory course will prepare you to work at an entry-level position in the solar industry and will provide you with the knowledge to take the North American Board of Energy Practitioners (NABCEP) PV Entry Level Exam. The 40-hour program combines lecture and discussion, in-class and out-of-class exercises, and hands-on activities. Cost - \$900.00 one week

INTRODUCTION TO GIS/GPS In this two-day training, participants will gain an understanding of fundamental geospatial concepts which they will then apply by learning how to use online mapping applications, consumer-grade GPS receivers, and QGIS open source GIS software. QGIS will be used to explore and display geospatial data, to create new geospatial data, to perform simple geospatial analysis, and to compose basic maps appropriate for printing or publishing. Participants will develop a mapping question or project that they will explore and build on throughout the training. qualifies for 6 VT DEC non-soil credits – Cost - \$450.00 one week

INTRODUCTION TO ARCGIS With this three-day training, participants will learn how to use ESRI's ArcGIS 10.0 software to explore and display geospatial data, to create new geospatial data and include it in their map projects, to perform geospatial analyses, to find and acquire free and public GIS data, and to compose basic maps appropriate for printing or publishing. Participants will develop a mapping question or project that they will explore and build on throughout the course. Qualifies for 9 VT DEC non-soil credits. Cost - \$300.00 2 days

Fundamentals of Crew Leadership – Construction – NCCER- This module will teach the skills needed to be an effective leader, including the ability to communicate effectively, provide direction to a crew and effectively plan and schedule the work of a crew. Cost - \$1000.00 2 months

Project Supervision – Construction – NCCER - Project Supervision is a comprehensive, competency based program that gives both veteran and new field managers a step-by-step approach to honing their natural abilities, developing essential skills, and generally improving their performance as leaders. As a one-level curriculum, Project Supervision covers topics such as Human Relations and Problem Solving, Safety, and Quality Control. Cost - \$3800.00 2- 3 months

WELDING Earn your AWS certification D1.1 in MIG welding. Five weekends (alternating, two weekends per month starting in September) will provide eighty hours of training and practice to prepare for the AWS exam, which will be given on the Saturday following the five-weekend course. All personal protective equipment will be provided except for MANDATORY leather boots and long-sleeved, natural fiber clothing (cotton, wool, or leather). The American Welding Society announced 372,000 open welding jobs nationwide in the early part of 2017. That number is expected to reach 450,000 by 2025. Cost- \$2500.00 2 months

Certified Indoor Air Quality Manager In this Certified Indoor Air Quality Manager Online Training and Certification course, you'll learn how to diagnose, resolve, and prevent indoor air quality (IAQ) complaints. You'll also establish a comprehensive IAQ plan specific to your buildings. Not only will this course teach you how to improve your building's indoor air, it will also prepare you for third-party certification by the American Council for Accredited Certification (ACAC). You'll learn about all the pertinent topics covered on the certification exam. You can even take a 100-question practice examination to prepare for certification. Cost - \$795- Online 16 hours

HEALTHCARE

Phlebotomy - The 45-hour Phlebotomy training program provides a combination of lecture, lab, clinical observation and hands-on practical experience aimed at developing the skills needed to work in an entry level position in medical facilities as a phlebotomist (blood drawing). The primary goal is to instill the latest information on blood collection techniques, skills and equipment for a safe and effective specimen collection, thus enhancing customer service and promoting patient care. Cost - \$650.00 12 weeks

Medical Terminology – Typically, a prerequisite for most healthcare positions, the Medical Terminology Online Training Program will teach you to understand not only medical terms themselves, but also their application. Participants start by learning the origins of medical words and how to recognize prefixes and suffixes used in medical terminology. Then participants learn about the body as a whole and how to differentiate cells, tissues, organs, systems, and cavities. Next, participants learn to define and describe the function of each system of the human body. Cost - \$795.00- Online 3 months

LNA

This training prepares students to step into an exciting career as a nurse assistant. Upon completion the student will be eligible to take the Vermont Board of Nursing exam to obtain a LNA license. Cost - \$1600 – online 3-6 months

Diversified Agriculture

Meat Cutting This training will cover all of the basics of whole-animal butchery with both instruction and hands-on demonstration. Participants will learn how to break down beef, pork, chicken, and lamb into primals, subprimals, and case-ready cuts. Value added processing, such as sausage, smoked hams, and bacon will also be covered. The training will place an emphasis on food safety, sourcing, and maintaining high utilization of whole animals. Cost - \$1000.00 2 weeks

Day 1: Introduction, Knife Skills and Chicken Breakdown

Day 2: Lamb Breakdown and Value Added Processing

Day 3: Beef Forequarter Breakdown and Value Added Processing

Day 4: Beef Hindquarter Breakdown and Value Added Processing

Day 5: Pig Breakdown, Value Added Processing, and Wrap Up

Game of Logging Based on the internationally accepted “Game of Logging” (GOL) developed by Soren Eriksson, our professional instructors teach timber harvesters, forest landowners, public workers, college students, and forestry tech school students the latest and safest techniques to operate/maintain their chainsaws, to directionally fell trees under a variety of circumstances, and to process wood products under compression/tension situations. Whether you have never used a chainsaw or have thirty years’ experience in the woods, GOL training is designed to develop safe working skills through demonstration and one-on-one, hands-on practice. GOL training is the industry standard for chain saw safety training and has been adopted by several state and federal agencies, as well as, organizations such as the Student Conservation Association, Technical Career Schools, Energy Companies, Federal/State Agencies, Municipal Services, Forest Landowner Associations, and much more. The standard program consists of four levels, each level making up an 8-hour day. All levels must be taken consecutively. Class size is limited to a maximum of 10 students per instructor. Cost - \$150 per day – 2 weeks

Craft Distilling - Vermont is one of the leaders in the nationwide boom in craft distilling. This training brings students into direct contact with a variety of processes involved in building, operating, and working in the distilling industry. Lectures, demonstrations, and hands-on experience at distilleries introduce students to distilling, still design, fermentation, distillery economics, and basic business and marketing skills. An emphasis is placed on scratch distillation of high quality spirits from local ingredients. The training also touches on such details as licensing, permits, environmental concerns, safety, and quality control. Cost - \$1200 one week
