

## **VELCO proposal for S.267 amendment**

February 25, 2020

1. VELCO has reviewed and can support the 2/24/2020 Department of Public Service proposed amendment.

2. Should the Senate Finance Committee not adopt that amendment, VELCO proposes the following:

In implementing this act, the Public Utility Commission, in consultation with the Department of Public Service, shall assess the sufficiency of Vermont's existing legal and regulatory framework to implement a 100% renewable energy standard and attendant Tier II 20% in-state generation requirement, including without limitation 30 V.S.A. §248 and the Commission's order in Case No. 17-1247-NMP.
