

Non-Emergency Medical Transportation Program

- The Non-Emergency Medical Transportation program uses a per member per week methodology to calculate weekly payments based on the total number of unduplicated individuals served over the prior 395 days (the past 30-day period is excluded).
- This reimbursement methodology allows for more predictable payments to the Contractor and the length of the time period in the methodology helps safeguard against sudden and drastic decreases in utilization.
- As a result, changes in utilization do not produce cost savings for the Department.

Regional Transportation Provider	1/1/19-5/4/19 (individual rides)	1/1/20-5/4/20 (individual rides)	Change
