Introduced by Senators Lyons, Clarkson, Hooker, McCormack and Pollina

Referred to Committee on

Date:

Subject: Health; tobacco products; tobacco substitutes; flavored tobacco products; e-cigarettes; e-liquids

Statement of purpose of bill as introduced: This bill proposes to ban the retail sale of flavored cigarettes, e-cigarettes, and e-liquids. It would eliminate the existing ban on and penalty for possession of cigarettes, e-cigarettes, and tobacco paraphernalia by individuals under 21 years of age and expand the applicability of provisions for the seizure and destruction of contraband tobacco products to include contraband e-cigarettes, e-liquids, and tobacco paraphernalia. The bill would also direct the Office of the Attorney General to report on the extent to which Vermont may legally restrict advertising and regulate labels for e-cigarettes and other vaping-related products.

An act relating to banning flavored tobacco products and e-liquids

It is hereby enacted by the General Assembly of the State of Vermont:

Sec. 1. FINDINGS

The General Assembly finds that:
(1) Tobacco use is costly. Vermont spends $348 million annually to treat tobacco-caused illnesses, including $87.2 million each year in Medicaid expenses. This translates into a tax burden each year of $759 per Vermont household. Productivity losses add an additional $232.8 million each year.

(2) Youth tobacco use is growing due to e-cigarettes. Seven percent of Vermont high school students smoke, but if e-cigarette use is included, 28 percent of Vermont youths use some form of tobacco product. More than one in four Vermont high school students now uses e-cigarettes. Use more than doubled among this age group, from 12 percent to 26 percent, between 2017 and 2019.

(4) Flavored products are fueling the epidemic. Ninety-seven percent of youth e-cigarette users nationally reported in 2019 that they had used a flavored tobacco product in the last month, and 70 percent cited flavors as the reason for their use. E-cigarette and e-liquid manufacturers have marketed their products in youth-friendly flavors such as gummy bear, birthday cake, candy cane menthol, and bubble gum.
(5) Mint- and menthol-flavored e-cigarettes are increasing in popularity among youths. Over the past four years, mint and menthol went from being some of the least popular to being some of the most popular e-cigarette flavors among high school students. Evidence indicates that if any e-cigarette flavors remain on the market, youths will shift from one flavor to another. For example, after Juul restricted the availability of fruit, candy, and other e-cigarette flavors in retail stores in November 2018, use of mint and menthol e-cigarettes by high school users increased sharply, from 42.3 percent reportedly using mint and menthol e-cigarettes in 2017 to 63.9 percent using them in 2019.

(6) It is essential that menthol cigarettes are included in a ban on flavored tobacco products, flavored e-liquids, and flavored e-cigarettes to prevent youths who became addicted to nicotine through vaping from transitioning to traditional cigarettes. Menthol creates a cooling and numbing effect that reduces the harshness of cigarette smoke and suppresses the cough reflex. Those effects make menthol cigarettes more appealing to young, inexperienced smokers, and research shows that menthol cigarettes are more likely to addict youths.

(7) Youth smokers are the age group most likely to use menthol cigarettes, but are also likely to quit if menthol cigarettes are no longer available. Fifty-four percent of youths 12–17 years of age nationwide who
smoke use menthol cigarettes. Nearly 65 percent of young menthol smokers say they would quit smoking if menthol cigarettes were banned.

(8) Eliminating the sale of menthol tobacco products promotes health equity. Menthol cigarette use is more prevalent among persons of color who smoke than among white persons who smoke and is more common among lesbian, gay, bisexual, and transgender smokers than among heterosexual smokers. Eighty-five percent of African-American adult smokers use menthol cigarettes, and of black youths 12–17 years of age who smoke, seven out of 10 use menthol cigarettes. Tobacco industry documents show a concerted effort to target African-Americans through specific advertising efforts.

(9) The U.S. Food and Drug Administration (FDA) agrees that menthol cigarettes harm the public health. In 2013, the FDA published a report concluding that removal of menthol cigarettes from the market would improve public health.

(10) Vermont cannot wait for the FDA to take action. The same federal legislation that was passed in 2009 banning all other flavored cigarettes allowed the FDA to regulate or ban menthol. Despite taking public comment on the dangers of menthol in 2013 and again in 2018, the FDA has still failed to act. The policy released by the FDA on January 1, 2020 falls far short of protecting Vermonters from the dangers of smoking and nicotine addiction. The FDA’s policy bans only flavored cartridge- or pod-based e-cigarettes
and even then exempts those that are menthol or tobacco flavored. Open tank

1
e-cigarettes and the flavored e-liquids used to fill them can still be sold, as can

flavored, self-contained, disposable e-cigarettes.
