Existing Regional Prevention Partnership Grantees

Locations:

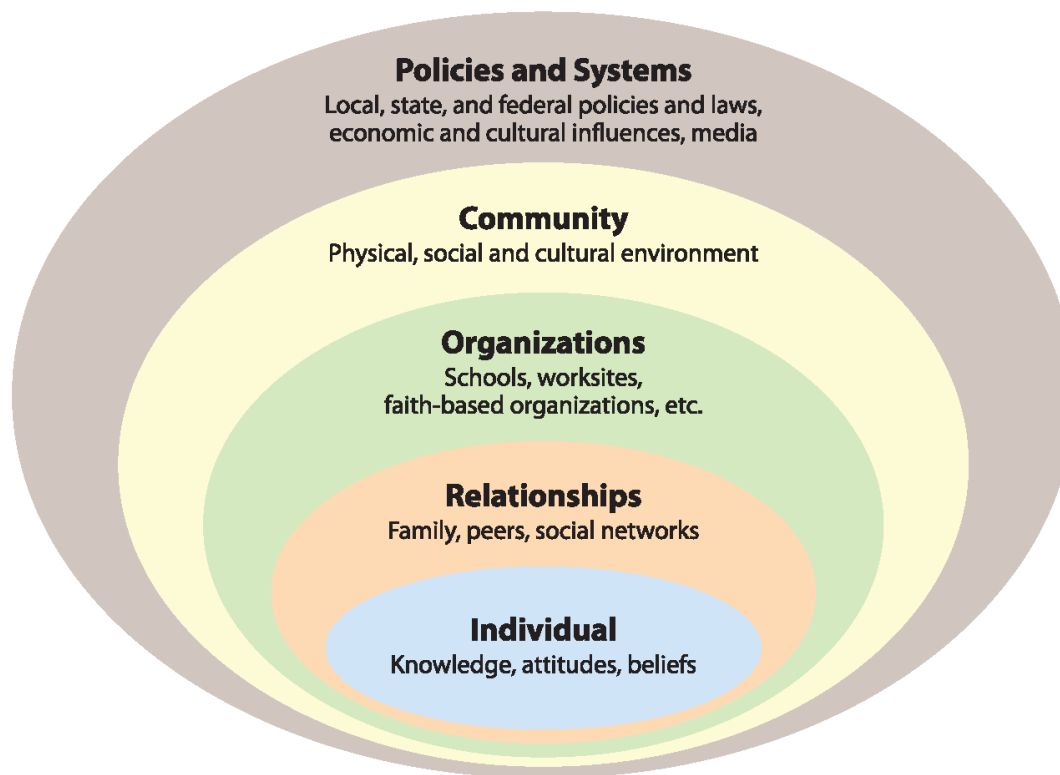

1. Franklin/Grand Isle
2. Rutland
3. Windham
4. Washington
5. Springfield

The Importance of Investing in Prevention

- Prevention positively changes knowledge, attitudes, beliefs, behaviors and environments that impact substance use
- Prevention must be inclusive of cultural values – i.e, efforts must consider the unique characteristics of the community
- A diverse partnership with representation from state, community, school, family and individuals is critical to implement change
- A comprehensive approach is needed to create and sustain positive change to prevent and reduce alcohol and other substance use
- There is no “one strategy” for all individuals and communities

The Vermont Prevention Model Promotes Intervention at Multiple Levels

The Strategic Prevention Framework (SPF)

- This is the framework that guides the development of prevention programming in Vermont
- Coalitions are required to complete a SPF informed process to develop a logic model, strategic plan, and work plan to address substance misuse in their regions and implement evidence-based programs and practices
