The Reynolds and Son, Inc. Fire Service Division position on use of PFOA and or PFOS in Firefighting Foam.

Reynolds and Son, Inc. established 1874 is the largest Vermont based industrial supply/fire service supply dealer. Reynolds and Son, Inc. proudly represents US Foam Technologies of Longview, Texas.

All US Foam products are PFOA and PFOS free. US Foam manufactures a full variety of firefighting foam using a technology that involves better chemicals and better science than earlier firefighting foams. US Foam has products for every firefighting situation.

For more on this technology, I invite you to speak with US Foam President Alden Ozment at (903) 241-6210 [alozment@aol.com](mailto:alozment@aol.com).

Reynolds and Son, Inc. Fire Service Division strives to promote and sell products of the highest quality, products with minimal impact on our environment, products that meet or exceed our customers' goals.

Michael Knight  
Fire Service Sales Manager
