

# **Petition: Legislative Action Against Plastics**

**We can make a difference in the growing problem of plastics, which impacts everything from global warming to wildlife to human health.**

**Plastics have an enormous impact on global warming; 3.8% of worldwide greenhouse emissions are from plastics. This is a huge problem, especially as our planet nears the point of no return in climate change.**

**The effect plastics have on marine life is similarly huge as over 700 species have been affected by them. This includes 90% of all sea birds and almost every single sea turtle.**

**Unfortunately, plastics are also incredibly dangerous to human health; many of the chemicals used in the creation of plastics are harmful to the brain and cause cancer. For instance, brain cancer rates in people who worked at a plastic manufacturing plant in Texas were 5 times that of the general public.**

Fortunately, there are some ways you can help and make a lasting difference in the fight against plastics. Fill out the petition below to show your support for anti-plastic legislation in Vermont.

**We, the undersigned, support efforts to reduce the creation and use of plastics in Vermont including extending the bottle bill to include more plastics and banning unnecessary plastics.\***
