9 Sec. 27. 32 V.S.A. § 9741(14) is amended to read:

10 (14)(A) Tangible personal property that becomes an ingredient or
11 component part of, or is consumed or destroyed or loses its identity in the
12 manufacture of tangible personal property for sale;

13 (B) ~~machinery~~ Machinery and equipment for use or consumption
14 directly and exclusively, except for isolated or occasional uses, used in or
15 consumed as an integral or essential part of an integrated production operation
16 by a manufacturing or processing plant or facility engaged in the manufacture
17 of tangible personal property for sale, or in the manufacture of other machinery
18 or equipment, parts, or supplies for use in the manufacturing process; ~~and~~
19 devices used to monitor manufacturing machinery and equipment or the
20 product during the manufacturing process. Machinery and equipment used in
21 administrative, managerial, sales, or other nonproduction activities, or used

1 ~~prior to the first production operation or subsequent to the initial packaging of~~
2 ~~a product, shall not be exempt from tax, unless such uses are merely isolated or~~
3 ~~occasional or unless the machinery used for initial packaging is also used for~~
4 ~~secondary packaging as part of an integrated process. Machinery and~~
5 ~~equipment shall not include buildings and structural components thereof. As~~
6 ~~used in this subdivision, it shall be rebuttably presumed that uses are not~~
7 ~~isolated or occasional if they total more than four percent of the time the~~
8 ~~machinery or equipment is operated. For the purposes of this subsection~~
9 subdivision (14), “manufacture” includes extraction of mineral deposits, the
10 entire printing and bookmaking process, and the entire publication process.

11 (C) As used in this subdivision (14):

12 (i) “Integrated production operation” means an integrated series of
13 operations at a manufacturing or processing plant or facility to process,
14 transform, or convert tangible personal property by physical, chemical, or other
15 means into a different form, composition, or character from that in which it
16 originally existed. Integrated production operations begin when raw material
17 is first changed physically, chemically, or otherwise in form, composition, or
18 character, including being removed from storage or introduced for this
19 manipulation, and end when the product is placed in initial packaging and shall
20 include production line operations, including initial packaging operations, and
21 waste, pollution, and environmental control operations.

1 (ii) “Manufacturing or processing business” means a business that
2 utilizes an integrated production operation to manufacture, process, fabricate,
3 or finish items for wholesale and retail distribution as part of what is
4 commonly regarded by the general public as an industrial manufacturing or
5 processing operation or an agricultural commodity processing operation.
6 “Manufacturing or processing business” does not include nonindustrial
7 businesses whose operations are primarily retail and that produce or process
8 tangible personal property as an incidental part of conducting the retail
9 business, such as retailers who bake, cook, or prepare food products in the
10 regular course of their retail trade; the assembling of product by retailers for
11 sale; grocery stores, meat lockers, and meat markets that butcher or dress
12 livestock or poultry in the regular course of their retail trade; contractors who
13 alter, service, repair, or improve real property; and retail businesses that clean,
14 service, or refurbish and repair tangible personal property for its owner. The
15 examples provided in this subdivision (ii) shall not be construed as exclusive.

16 (iii) “Manufacturing or processing plant or facility” means a
17 single, fixed location owned or controlled by a manufacturing or processing
18 business that consists of one or more structures or buildings in a contiguous
19 area where integrated production operations are conducted to manufacture or
20 process tangible personal property to be ultimately sold at retail. A business
21 may operate one or more manufacturing or processing plants or facilities at

1 different locations to manufacture or process a single product of tangible
2 personal property to be ultimately sold at retail.

3 (iv) “Primary” or “primarily” means more than 50 percent of the
4 time.

5 (v) “Production line” means the assemblage of machinery and
6 equipment at a manufacturing or processing plant or facility where the actual
7 transformation or processing of tangible personal property occurs.

8 (D) For the purposes of this subdivision (14), machinery and
9 equipment shall be deemed to be used as an integral or essential part of an
10 integrated production operation when used during the integrated production
11 operation:

12 (i) to transport, convey, handle, or store the property undergoing
13 manufacturing or processing at any point from the beginning of the production
14 line until it is placed into initial packaging;

15 (ii) to act upon, effect, promote, or otherwise facilitate a physical
16 change to the property undergoing manufacturing or processing;

17 (iii) to guide, control, or direct the movement of property
18 undergoing manufacturing or processing;

19 (iv) to test or measure materials, the property undergoing
20 manufacturing or processing, or the finished product during the manufacturer’s
21 integrated production operations;

1 (v) to plan, manage, control, or record the receipt and flow of
2 property while undergoing manufacturing or processing;

3 (vi) to lubricate, control the operating of, or otherwise enable the
4 functioning of other production machinery and equipment and the continuation
5 of production operations;

6 (vii) to transmit or transport electricity, gas, water, steam, or
7 similar substances used in production operations from the point of generation,
8 if produced by the manufacturer or processor at the plant site, to that
9 manufacturer’s production operation; or, if purchased or delivered from off–
10 site, from the point where the substance enters the site of the plant or facility to
11 that manufacturer’s production operations;

12 (viii) to package the property being manufactured or processed in
13 any container or wrapping in which such property is normally sold or
14 transported, even if the machinery operates after the point of initial packaging;

15 (ix) to cool, heat, filter, refine, or otherwise treat water, steam,
16 acid, oil, solvents, or other substances that are used in production operations;

17 (x) to provide and control an environment required to maintain
18 certain levels of air quality, humidity, or temperature in special and limited
19 areas of the plant or facility where such regulation of temperature or humidity
20 is part of and essential to the production process;

1 (xi) to treat, transport, or store waste or other byproducts of
2 production operations at the plant or facility and to clean manufacturing
3 machinery and equipment;

4 (xii) to control pollution at the plant or facility where the pollution
5 is produced by the manufacturing or processing operation; or

6 (xiii) to inspect or conduct quality control on the product, even if
7 the inspection or quality control machinery operates after the point of initial
8 packaging.

9 (E) “Machinery and equipment used as an integral or essential part of
10 an integrated production operation” does not mean:

11 (i) machinery and equipment used for nonproduction purposes,
12 including machinery and equipment used for plant security, fire prevention,
13 first aid, accounting, administration, record keeping, advertising, marketing,
14 sales or other related activities, plant cleaning, plant communications, and
15 employee work scheduling;

16 (ii) machinery, equipment, and tools used primarily in maintaining
17 and repairing any type of machinery and equipment or the building and plant;

18 (iii) transportation, transmission, and distribution equipment not
19 primarily used in a production, warehousing, or material handling operation at
20 the plant or facility, including the means of conveyance of natural gas,

1 electricity, oil, or water, and related equipment, located outside the plant or
2 facility;

3 (iv) office machines and equipment, including computers and
4 related peripheral equipment, not used directly and primarily to control or
5 measure the manufacturing process;

6 (v) furniture and other furnishings;

7 (vi) buildings, other than exempt machinery and equipment that is
8 permanently affixed to or becomes a physical part of the building, and any
9 other part of real estate that is not otherwise exempt;

10 (vii) building fixtures that are not integral to the manufacturing
11 operation, such as utility systems for heating, ventilation, air conditioning,
12 communications, plumbing, or electrical;

13 (viii) machinery and equipment used for general plant heating,
14 cooling, and lighting; or

15 (ix) motor vehicles that are registered for operation on public
16 highways.

17 (F) Subdivisions (D) and (E) of this subdivision (14) shall not be
18 construed as exclusive lists of the machinery and equipment that qualify or do
19 not qualify as an integral or essential part of an integrated production
20 operation. When machinery or equipment is used as an integral or essential
21 part of production operations part of the time and for nonproduction purposes

1 at other times, the primary use of the machinery or equipment shall determine
2 the qualification of the machinery or equipment for the exemption.
