**Subject:** Hearings ~ Testimonial

Greetings,

3 points to reiterate among many, relevant ones:

- The incredible value the campuses bring to their local communities and the state.
- Our students need an affordable option for college. They are currently paying one of the highest tuitions in the country and carry more debt after graduation.
- Our community response to the attempts to close the campuses last spring, was massive.

Thank you for your support and deep reflections on these matters. May today's hearings be positive and affirming.

Sincerely,

Lisa
