## Department Strategic Overview

**New Document Management System:** As part of the Department of Financial Regulation's efforts to use industry best practices and advanced information technology solutions, the department requires a robust document management system. In consultation with the Agency of Digital Services, the department is planning to use an Enterprise Document Management System (EDMS) provided by Highland OnBase. We are looking to convert manual, paper-based processes to digital workflows and digitize paper files/records currently retained.

Transitioning to an enterprise record management system will:

1. increased productivity,
2. reduce reliance on storage space at the Vermont Records Center,
3. create a more efficient search and retrieval of archives,
4. support public record requirements, and
5. improve data security and information sharing.
