

Dear Speaker Krowinski, Chair Webb, and Members of the House Committee on Education,

Your work is appreciated on the issue of student equity, but another study is not needed.

Vermont needs to act NOW to create educational equity by passing legislation to adopt the recommendations made in the Pupil Weighting Factors Report. Please do not delay this with more studies. Children are currently being harmed by inequities and you can help make a difference.

It is far past time to enact equitable funding systems based on data, reality, and outcomes for our students.

No more task forces; please act NOW.

Sincerely,
Tracy Weatherhogg
Middletown Springs, VT
