## Memorandum

To: Legislative Committee on Administrative Rules

From: Daniel A. Whipple, VOSHA Program Manager

A handwritten signature in blue ink that reads "Dan Whipple".

Subject: Request for consideration of amended clean text of rule, **29 CFR 1910.1024, Updates and Revisions of the Beryllium Standard for General Industry**

Date: December 14, 2021

Dear LCAR Committee Members,

Please accept this request for consideration of the updated clean text version of the rule, 29 CFR 1910.1024, Updates and Revisions of the Beryllium Standard for General Industry. As you will note, when reviewing the annotated text version of this rule, in 29 CFR 1910.1024(b) *Definitions*, the definition for Beryllium Work Area, as proposed in the annotated text version was changed. However in the process of creating the clean text version of this rule, I had inadvertently left this definition out. This was an oversight and was thankfully noticed by Attorney Damien Leonard, Legislative Counsel for LCAR.

As is clearly indicated in the annotated version of this rule, this was an oversight and it was the intent of VOSHA to include the proposed change in the new rule proposal. As such, VOSHA has decided to submit the updated clean text version of this rule, with this letter, and ask for consideration of this version during LCAR deliberations.

We apologize for any difficulty this has caused and thank you in advance for your consideration.
