

Agency of Natural Resources,  
 Department of Environmental  
 Conservation's  
 FY 2023 Governor's Recommend Budget

**MISSION:** The mission of the Vermont Department of Environmental Conservation is to preserve, enhance, restore, and conserve Vermont's natural resources, and protect human health, for the benefit of this and future generations.

**Governor's Recommend Base Budget FY 2023**  
**\$119.78m (does not incl. ARPA \$ or one-time \$)**  
**299 Staff**

**FY 2023 SUMMARY & HIGHLIGHTS**

- Annualized salary and benefit (Pay Act) increase of \$2.7m across all DEC funding sources
- Continued aggressive annual vacancy savings for FY23 at \$763k across all funding sources
- Reduction of one currently vacant position that will be held open for all of FY23 to help absorb ongoing operational costs along with level to declining revenues
- Overall change in annual adjustments related to pass-through grants and contracts for a net decrease of \$3.7m (i.e., decrease in one-time ECF/PCB funding from FY22, increase in Clean Water Fund, etc.)
- Increase \$200k in various operating expenditures and \$85k~ increase in internal service funds (G/L ins., W/C, FFS, DHR)
- Creation of one new federal funded position to support implementation of new federal drinking water standards
- Additional \$400k base GF to support the annual software license costs needed for DEC's citizen facing Permit Navigator/Collaborator permit portal tools
- Additional \$150k base GF to support on-going annual updates to Vermont wetland maps to ensure information remains current and of the highest utility to Vermonters
- One-time \$250k GF appropriation to complete a comprehensive update of the statewide Vermont Significant Wetlands Inventory (VSWI) maps *(not in base budget)*
- Additional ARPA funding of \$69.5m for water/sewer infrastructure investments; \$250k to provide technical assistance to the statewide hazard mitigation program *(not in base budget)*

## **Department Mission Statement**

The mission of the Vermont Department of Environmental Conservation is to preserve, enhance, restore, and conserve Vermont's natural resources, and protect human health, for the benefit of this and future generations.

## **Description of Divisions, Appropriations, and Programs**

By statute and through delegation from the Agency of Natural Resources, the Department of Environmental Conservation is charged with protecting public health and the environment. The Department meets this challenge through: (1) limiting environmental impacts through permits, compliance inspections, and enforcement; (2) delivering financial assistance to communities, citizen groups and businesses; (3) providing public education and technical assistance to communities, citizen groups and businesses; (4) monitoring environmental quality and public health; and (5) protecting and restoring natural resources. The Department strives to treat citizens and businesses fairly, honestly and openly, to provide programs that are efficient and cost-effective, to lead by example, and to make timely decisions.

The Department administers various state and federal programs with responsibility for regulating the discharge or emission of pollutants into the air, water or soil. Many of these programs are administered under the authority of federal law with the approval of the United States Environmental Protection Agency. In this way, the State of Vermont retains a central role in decisions affecting its citizens and is eligible to receive federal funds to implement these programs.

The Department has three appropriations that cover the Department's work across seven divisions. Descriptions of each division are located below under their appropriation. An appropriation for the Connecticut River Valley Flood Control Compact for Tax Losses, formerly its own appropriation, was integrated in SFY2018 within the Office of Waters Appropriation.

## **Management and Support Services Appropriation**

### Commissioner's Office

The Commissioner's Office provides leadership, management, business, policy and planning services for all departmental divisions and programs.

### Environmental Compliance Division

The Environmental Compliance Division houses the Environmental Assistance Office and the Environmental Enforcement Office, providing the regulated community the full range of compliance activities, through proactive environmental assistance as well as reactive environmental enforcement. Assistance activities include providing guidance to potential permit applicants, continuously working to streamline environmental permitting and information, working with communities and municipalities to better understand and comply with environmental regulations, and providing help to businesses and individuals who are new to or have difficulty navigating environmental permitting. The Division assists businesses, communities, state agencies, and others in identifying effective and economical ways to promote environmentally sustainable development and to safeguard human health. The Division is also charged with enforcing the laws and regulations administered by the Agency of Natural Resources, primarily for the Department of Environmental Conservation, but also for the Department of Forests, Parks and Recreation. The Department of Fish and Wildlife handles most of its own enforcement. The Division also coordinates with the Agency of Agriculture, Food and Markets regarding cases involving that agency's jurisdiction. Enforcement activities include civil and criminal investigations, prosecution of administrative enforcement cases before the Environmental Court, and screening and referrals of criminal and civil cases (as appropriate) to the state's attorneys and the Attorney General. The goal is to integrate all compliance activities in a manner that protects the environment and public health, ensures the integrity of the Agency's regulatory programs, and provides an even playing field for all Vermonters. Providing the full range of compliance strategies under one division allows for the strategic administration of Department compliance services and promotes the recognition of and responsiveness to compliance trends.

### Vermont Geological Survey

The Vermont Geological Survey conducts mapping, research and provides aid and advice about the state's geology, mineral resources and topography. The Geological Survey performs bedrock and surficial mapping, applied studies, digital map products, data distribution, and education. Geological information collected, analyzed and disseminated by the Survey plays a significant role in locating groundwater supplies, arranging waste disposal, understanding the

movement of contaminants, and addressing natural hazards such as landslides, radioactivity, erosion, and earthquakes. Public service maps derived from the base geology are used to protect public health and safety.

### Administration & Innovation Division

The Administration & Innovation Division encompasses a range of central services functions which serve the entire Department. Those functions include financial management; operational services including resource allocations (e.g., information technology, personnel, Fleet, records management, procurement, office space and logistics); and Department-wide planning and reporting (e.g., U.S. Environmental Protection Agency Performance Partnership Agreement, strategic planning, results-based accountability, and performance measures tracking). In addition, the Department's ECO AmeriCorps Program and Business Transformation Initiative (BTI) is led by this division. Our ECO AmeriCorps Program stands for Environmental Career Opportunities and is a service-based program aimed to guide the next generation of Vermont's environmental leaders through enriching and immersive experiences. By collaborating with our host site partners, we can add vital capacity to strengthen local communities and foster a deeper stewardship of our natural environment. This Initiative involves coordination with both internal and external entities as DEC undertakes a system of continuous improvement in our business practices. The BTI is a resource strategy, allowing the Department to free up and shift capacity where possible to higher value work as efficiencies are found. The goal is to provide the best level of service to the Vermont public, making it easier for businesses, municipalities, and citizens to access our programs and services. A related goal of this effort is to increase the transparency of the department's work – making information more readily available and accessible electronically.

### **Air and Waste Management Appropriation**

#### Air Quality and Climate Division

The Air Quality and Climate Division (AQCD) implements state and federal programs to protect and improve air quality, with the goal of protecting public health and the environment. As part of this implementation, the AQCD monitors air quality and air pollution sources, conducts emissions inventories and modeling, proposes regulations to improve existing air quality, ensures compliance with the regulations, and issues permits to control pollution from sources of air contaminants across the state. Additionally, the AQCD has been actively involved at the national level in efforts to document and reduce the impact of out-of-state coal-fired power plants on public health and the environment in Vermont. The Division has worked with neighboring jurisdictions to develop a regional climate action plan, and participates in the Regional Greenhouse Gas Initiative (RGGI), the first market-based regulatory program in the US to reduce greenhouse gas emissions. The Division actively advances strategies to reduce sources of air pollution in Vermont, including efforts to increase zero emission vehicles and the corresponding infrastructure in Vermont, and to decrease particulate matter emissions from outdoor wood boilers and wood stoves. The Division has been at the forefront of greenhouse gas

reduction initiatives and is one of a small number of states that have joined with California in adopting Low Emission Vehicles Rules. The AQCD's five Sections (Planning, Monitoring, Compliance, Permitting, and Mobile Sources) coordinate to protect and improve air quality through identification, characterization, and management of risks and impacts to public health and the environment.

### Waste Management and Prevention Division

Through a combination of assistance, planning, regulation, permitting, and inspections, the Waste Management and Prevention Division oversees the management of solid and hazardous wastes to protect the public health and the environment. Hazardous and solid waste programs are managed to meet Vermont environmental law and regulatory standards and U.S. Environmental Protection Agency standards for the Resource Conservation Recovery Act. This program also implements the State's Materials and Solid Waste Management Plan with a focus on helping Vermont households and businesses find convenient, affordable ways to divert organic material (yard and food waste) and recyclables away from landfills and into economically valuable uses. The Division also oversees the investigation and remediation of sites contaminated by hazardous wastes from petroleum, chemical, and industrial release. The Petroleum Clean-up Fund is managed to remediate sites contaminated by petroleum. The Brownfield Program promotes and assists in the clean-up and reuse of contaminated properties. The Underground Storage Tank Program is responsible for overseeing the management of underground storage tanks. In addition, the division maintains a 24-hour Spill Response Team to provide assistance in the control and clean-up of spills.

### **Office of Waters Appropriation**

#### Water Investment Division

In response to enactment of water quality legislation Act 76 in 2019 and to facilitate the provision of funding for clean water projects, the Water Investment Division was formed through restructuring of two existing divisions. The new division is responsible for managing tens of millions of state and federal dollars annually, and providing in-house technical assistance, to support a wide array of clean water projects.

The Division provides the critical service of developing 15 Tactical Basin Plans (TBPs) that provide a holistic guide to inform clean water restoration and protection priorities statewide. The priorities described in TBPs are based on information provided by the Watershed Management Division's monitoring and regulatory programs and are implemented by state, federal and non-profit organizations, municipalities, regional planning commissions, natural resource conservation districts, watershed groups, and private citizens. Plans in the Lake Champlain Basin provide the basis for implementing the Lake Champlain Phosphorus TMDL. These plans are updated every 5 years to show where progress has been made and where more work needs to be accomplished.

The Division funds, tracks, and reports on priority projects identified in TBPs and communicates progress toward meeting

water quality restoration targets. This work includes coordinating funding, tracking, and reporting of clean water efforts for federal and state partners, such as the Agencies of Agriculture, Food and Markets, Commerce and Community Development, and Transportation, and the Lake Champlain Regional Conservation Partnership Program of the Natural Resources Conservation Service. In addition, the Division offers technical expertise in stormwater master planning, illicit discharge detection and elimination, and green infrastructure.

Additionally, the division assists in the planning, design, construction, and first year operational phases for new construction or upgrade of municipally owned (including public schools) and privately-owned public water supply, wastewater, and stormwater systems. These projects are financed through various state and federal grant and revolving loan programs administered by the Division.

Planning and implementation of construction improvement projects for state lands and facilities owned by the Agency of Natural Resources and its three Departments that include: dams, parks, fishing access areas, fish culture stations, and wildlife management areas, are also managed by the division.

Lastly, the Division also administers a Dam Safety Program, which involves safety inspections of non-power generating dams and review and permitting for dam alteration projects.

### Watershed Management Division

The Watershed Management Division is responsible for managing surface water quality and quantity for over 800 significant lakes and ponds, 23,000 miles of rivers and streams, and 300,000 acres of wetlands that exist within Vermont. To accomplish this mission, the Division's eight major programs act to protect, maintain, enhance, and restore surface waters in the following ways.

The Division provides regulatory oversight and technical assistance to ensure proper design and construction of storm water treatment and control practices as well as construction-related erosion prevention and sediment control practices, necessary to minimize the adverse impacts of storm water runoff to surface waters throughout Vermont. It also administers the federally delegated permitting programs for municipal and industrial wastewater discharges, and the state permitting programs for residuals management. The Division oversees the wastewater operator certification program.

The Division conducts chemical, physical and biological environmental monitoring and provides guidance to citizen monitoring programs to determine current quality and threats to that quality. It publishes assessments of streams, rivers, lakes and wetlands that are utilized by the Water Investment Division and external partners to develop tactical basin plans and implement clean water projects.

The Division is responsible for identifying and protecting wetlands and the functions and values they provide. Activities to achieve these goals include education and permitting. Similarly, the Division protects lakes by providing assistance to municipalities, lake associations, and individuals regarding lake management and protection. Finally, the Division

protects river systems and floodplains by providing technical and regulatory assistance for projects in river corridor and floodplains to avoid and mitigate flood and erosion hazards, and to increase retention of sediments, nutrients, and riparian habitat. This program also coordinates hydroelectric dam licensing reviews, and assures that stream flows below dams, water withdrawals, and hydropower reservoirs meet minimum standards.

### Drinking Water and Groundwater Protection Division

The Division's drinking water programs are responsible for ensuring that Vermont's 1,400 public water systems provide clean and safe water to their customers. It does this through permitting all aspects of source water development, construction and operation. In addition, public health protection is provided by performing sanitary survey inspections, providing technical assistance, performing compliance assistance, certifying public water systems operators (including operator training), performing implementation management of EPA regulations of the Safe Drinking Water Act, and developing a public water system's managerial, technical and financial capability of operating (otherwise known as the capacity development program). Some recent successes of the capacity development program were providing leak detection services and asset management training, which helped water systems target needs for improvements and funding. For example, the Drinking Water State Revolving Fund is a low interest loan program that has been used to help finance technical and compliance issues. In support of the Groundwater Public Trust concept, the Division also oversees the state's groundwater protection and well driller's regulatory programs and regulates large groundwater withdrawals.

The Division administers the wastewater system and potable water supply rules from its five regional offices. These rules regulate soil-based wastewater systems and on-site water supplies with a design capacity of less than 6,500 gallons per day as well as all connections to the municipal water and wastewater systems. The program currently covers all single-family residences, commercial development, public buildings, mobile home parks, and campgrounds and issues approximately 3,000 permits annually. This division also licenses the designers of the systems it permits.

The Division issues Underground Injection Control permits that regulate the discharge of non-sanitary wastewater into the ground. The Division also issues permits for land-based sewage treatment and disposal systems greater than 6,499 gallons per day, including septic tanks, leach fields, and treatment plants and spray disposal systems

The Connecticut Valley Flood Control Compact (CVFCC) was formerly in its own appropriation; however, this small appropriation was incorporated into our Office of Waters appropriation back in the SFY2018 budget. This CVFCC special fund facilitates the management of receipts from Connecticut and Massachusetts as well as Vermont's share for tax losses in Vermont towns where the U.S. Corps of Engineers has built flood control projects.

## **Department of Environmental Conservation SFY23 Key Budget Changes**

### **Programmatic Opportunities and Obligations**

In order to build a balanced SFY23 budget, DEC is requesting additional general fund to meet some of the demands of the ongoing operational costs, as well as reducing one position within our Office of Waters appropriation to help absorb the increased salary and benefit costs. With the increased operational costs, coupled with growing state and federal obligations, the Department is reaching a critical point in terms of financial resources in several key programmatic areas necessary to meet its obligation to protect public and environmental health. In the construction of the SFY24 budget, DEC and the Administration will need to consider the revenue sources for all of our programs and propose changes to address shortcomings in order to support the Administrations priorities as it pertains to the environment.

There is a request for a new federally funded position within our Public Drinking Water Program within the Office of Waters appropriation which is seeking to add an Environmental Analyst V to administer the federal Safe Drinking Water Act requirements. The Safe Drinking Water Act compliance team administers the state and federal drinking water requirements to public water systems in Vermont. There are over 1,400 public water systems providing drinking water to 70% of the Vermont population and serving approximately 625,000 citizens and visitors each day. The work of this team is the front lines of ensuring Vermonters and visitors have drinking water that meets primary, secondary, and state standards and is safe to drink. This work includes assessing compliance with Maximum Contaminant Levels/Action Levels, monitoring requirements, and public notification for the 18 federal regulations that comprise the National Primary Drinking Water Standards and state standards relating to Uranium and PFAS. When water is determined not suitable for human consumption this team issues “Do Not Drink” and “Boil Water” Notices and determines when these notices can be lifted, and the water is again safe to drink. Both state and federal drinking water requirements have increased substantially in volume and complexity over the last decade while staffing in the program has remained same. In many cases a single staff member is assigned to implement multiple major federal regulations, and in all cases, we lack redundancy for any of the rule managers. Each new requirement has substantial impact on this team and the situation has reached a critical point; not only in terms of staff burnout but also our ability to successfully maintain primacy requirements for Vermont’s program. The Drinking Water Program (and the Division as a whole) has undergone a significant re-organization effort. The over-arching purpose of the re-organization plan was to improve the efficiency, quality, and effectiveness of public drinking water regulation for Vermont and re-align resources with strategic priorities for the program. The plan also sought to addresses historical “pain points” within the Division that are resource constrained, including changes to the compliance section to address workload issues. While the plan has been successfully executed, it is clear the resource issues still exist within this team and addressing this constraint is once again a top strategic priority

for the Division. The reallocation of existing resources has been fully evaluated and there are no clear options that exist within the existing organization. Existing resources have been optimized through the recent re-organization. The Department has included a new position in our Office of Waters appropriation as a New Initiative in Vantage. This position added as a decision item in Vantage under the Office of Waters appropriation. Environmental Analyst V (Job code: 145308 – Pay Grade 24). This position will be funded with federal funds from the U.S. Environmental Protection Agency and is budgeted at \$125k.

In addition, with CARES Act funding, in FY21 the Department was able to contract out and build an electronic “Permit Navigator” tool that works to make environmental permitting more transparent, accessible, and user-friendly. This online tool allows a potential permit applicant to drop a pin on a map and answer a series of “Yes”, “No”, “I don’t know” questions, and the Navigator will return information on what permits might be needed for their project, the regional contact for that permit, how much it will cost, and how long that process might take. Permit Navigator utilizes a person’s answers and queries existing ANR atlas information and the “Salesforce” customer relationship management (CRM) system to improve the efficiency and transparency of permit assistance between the public and internal staff. A second phase of Permit Navigator (named “Permit Collaborator”) is in the early stages of development that will connect the Salesforce platform from Permit Navigator directly to ANR Online (the Department’s electronic system for applying for environmental permits) and the individual permit databases. This will bring more efficiency and transparency to the permitting process by allowing staff and the public to know the real-time status of each permit that’s being applied for, who is working on those permits, and facilitating better communication around projects that require multiple permits from different programs. Both Permit Navigator and Permit Collaborator are part of a larger vision and process to make environmental permitting quicker, less complicated, and more transparent for the public. Implementation funding to develop the Permit Collaborator is part of the BAA (shifting funding from ARPA to General Fund). Also, \$400,000 of additional funding would be to the Department for the ongoing long-term operational and software licensing costs to support these permit process improvement activities.

The proposed budget includes funding that will be used to overhaul the State’s outdated Vermont Significant Wetlands Inventory (VSWI) mapping to vastly improve the identification of Vermont’s wetlands statewide. The VSWI is commonly used by municipalities, landowners, developers, and conservation organizations for project planning. The updates will allow for improved notice of wetland locations and increase the reliability of the map product. The \$250K one-time funding will allow for experienced mapping contractors to create the updates that meet federal standards\* and for the DEC Wetlands Program to provide draft map review and map outreach to the public. The statewide map will be completed by the end of 2024, with improvements starting this summer. After the initial overhaul, the additional base budget funding of 150K will allow contractors and DEC staff to maintain wetland mapping using the latest technology and wetland

information to ensure the relevance of the map product into the future.

### **Pressures on Staff and Administrative Costs**

At DEC's current staffing levels (approximately 300+ employees) and incorporating the increased benefit rates from SFY22, as well as those for SFY23, we are projecting an overall salary and benefit increase of \$2.7m across all funding sources. DEC absorbed these increased salary and benefit costs to the maximum extent practicable with available special and federal fund revenue resources but were unable to fully cover the increase. As a result, the FY23 budget includes a continued aggressive vacancy savings target (\$763k, which is approximately 6 positions); in order to be attainable, this will necessitate holding vacant one position within our Office of Waters appropriation throughout FY23. The position is in the Lakes & Ponds Program.

Within the detail of this budget, to address the Pay Act (salary) and SFY22/SFY23 benefit rate increases, DEC has maximized the use of all special and federal funds available to be able to absorb 82% of the \$2.7m (\$2.2m) increase in salaries and benefits leaving a general fund need of the remaining 18% (\$460k). In addition to this \$2.7m, there is an increase of \$68k for the additional salary and benefit costs associated with the staff attorneys servicing DEC but located in the ANR Central Office. Relatedly, there is also an increase in the DEC's Administrative Services Allocation that spreads largely the total Pay Act (salary) and benefit increases from within our Management and Support Services appropriation across the DEC's media programs within the Air and Waste appropriation and the Office of Waters appropriation to effectively leverage against their respective funding sources for a total of \$885k. This \$885k is not an additional increase in expenses, but rather a budgeting of spending authority needed to process the intra-departmental allocation of these administrative costs proportionately back to the programs and their funding sources.

This budget includes an increase in some of the various Internal Service funds (Fee for Space, W/C G/L Insurances, DHR, VISION, etc.) of approximately \$85k~. The budget also includes various adjustments related to grants and contracts, several one-time, that DEC administers annually whose amount and categorization between grant and contract line items regularly fluctuates from year to year. Overall, they include a net decrease of \$3.7m and are detailed individually in our attached SFY23 Budget Development form. Lastly, this budget includes an increase of \$200k across all three of our appropriations for minor adjustments to various DEC operating line items (i.e., bank fees, NL lease, Fleet leases, lab sampling, training, etc.) and the related funding sources.

**Programmatic Performance Measure Report**

**Attachment A-2**

<b>Governmental Unit</b>	Agency of Natural Resources - Department of Environmental Conservation
--------------------------	--

<b>Program Name</b>	<b>Underground Storage Tanks</b>
<b>Program Description</b>	Underground Storage Tank: The number of releases of hazardous materials to the environemnt, from approximately 7,000 underground storage tanks, is reduced through assistance, permitting and enforcement.

Measure Name	Measure Type	Previous Period Value	Current Period Value	Reporting Period
Number of underground storage tank facility inspections	How Much?	310	347	FFY
Percentage of underground storage tank facilities in significant operational compliance	How Well?	78	84	FFY
Number of underground storage tank releases	Better Off?	3	2	FFY

<b>Program Name</b>	<b>Electronic Waste Recycling</b>
<b>Program Description</b>	E-Waste: Program creates a statewide electronics collection and recycling system which will protect Vermonters and their environment.

Measure Name	Measure Type	Previous Period Value	Current Period Value	Reporting Period
The pounds of covered electronic devices (computers, monitors, printers, televisions, computer peripherals) per number of Vermont residents.	Better Off?	4.94	5.00	SFY
The total number of locations that provide collection of covered electronic devices at no charge under the State Standard Program or the Opt-Out Program	How Well?	102	101	SFY

<b>Program Name</b>	<b>State Revolving Loan Fund</b>
---------------------	----------------------------------

<b>Program Description</b>	SRF: Clean water and drinking water state revolving loan funds are used to provide low cost financing for municipally and certain privately owned drinking water, wastewater and stormwater infrastructure to protect public health and the environment.
----------------------------	--

Measure Name	Measure Type	Previous Period Value	Current Period Value	Reporting Period
Dollars invested per year	How Much?	\$36,826,335	64,395,428	SFY
Number of projects initiated	How Much?	43	58	SFY

<b>Program Name</b>	ECO AmeriCorps
---------------------	----------------

<b>Program Description</b>	ECO AmeriCorps: Program recruits and implements an AmeriCorps Program with 24 full-time AmeriCorps members dedicating to improving water quality, community outreach and waste reduction.
----------------------------	---

Measure Name	Measure Type	Previous Period Value	Current Period Value	Reporting Period
Total number of member service hours per year	How Much?	36,620	38,430	FFY
Number of community volunteers recruited and supported per year	How Well?	1,107	746	FFY
Number of miles of Vermonts rivers, streams and trailed improved	Better Off?	18.8	20	FFY

<b>Program Name</b>	Compliance and Enforcement
---------------------	----------------------------

<b>Program Description</b>	Compliance and Enforcement Services: Proactive management of compliance matters, enforcement of all lays & regulations, litigations services involving enforcement investigations and cases.
----------------------------	--

Measure Name	Measure Type	Previous Period Value	Current Period Value	Reporting Period
Number of Incidents Closed	How Much?	2300	2672	CY
Rate of Violations Found	How Much?	47%	40%	CY
Rate of Violations Returned to Compliance	Better Off?	92%	89%	CY

<b>Program Name</b>	Hazardous Site Management
---------------------	---------------------------

<b>Program Description</b>	Sites Management: Scientists identify, evaluate, control and remediate more than 1,400 hazardous waste sites from petroleum, chemical and ind
----------------------------	---

Measure Name	Measure Type	Previous Period Value	Current Period Value	Reporting Period
Number of new hazardous waste sites opened	How Much?	73	73	CY
Number of hazardous sites closed	Better Off?	57	72	CY

<b>Program Name</b>	Regional Office Permits
<b>Program Description</b>	Wastewater systems and potable water supplies for new development or changes in existing developments are permitted to protect surface and groundwater quality and public health. Permit services are provided through five regional offices.

Measure Name	Measure Type	Previous Period Value	Current Period Value	Reporting Period
Annual number of permits issued	How Much?	2433	3007	SFY
Average number of DEC inhouse permit review days	How Well?	24	19	SFY
Average number of total days from permit application to issuance	How Well?	46	37	SFY

<b>Program Name</b>	Public Water System Resource Management
<b>Program Description</b>	Public Water System Resource Management, including operations and engineering, compliance and support, indirect discharge, and underground injection control: Through local planning and regulation, surface water and groundwater resources are protected to ensure the quality and quantity of the resources that supply public water systems.

Measure Name	Measure Type	Previous Period Value	Current Period Value	Reporting Period
Percent of water systems with on-time inspections (	How Much?		96.00%	SFY
Percent of water systems with on-time inspections (	How Much?		66%	SFY
Percent of community drinking water systems in cor	Better Off?	99.55%	99.91%	SFY
