

You are Pre-Qualified for Georgia Power's Energy-Saving Pilot Program

Dear Valued Customer,

To help lower your energy bills, you have been pre-qualified to receive energy efficiency improvements to your home, at no upfront cost to you, through the new Georgia Power **Residential Investment for Saving Energy (RISE) Pilot™**.

Participation in the RISE Pilot starts with a free home energy assessment to identify the energy-saving opportunities specific to your home. Based on these findings, improvements may include the installation of a smart thermostat, new lighting, heating and air servicing, and other qualifying upgrades to help you save money and energy.

Georgia Power invests in the upfront cost for you and recovers the cost through a monthly charge on your electric bill. But don't worry, the estimated savings are designed to exceed the additional charge so that you can enjoy energy savings and a lower monthly bill.

Pilot participation is limited.

To learn more about the RISE Pilot and to schedule your free home energy assessment, visit georgiapower.com/RISEPilot or call **1-800-490-5485** today.

Sincerely,
Georgia Power's RISE Pilot Team
