Dear Senate Transportation Committee members,

Thanks for your support in the area of alternative transportation. We have had a great deal of interest over the past 2 seasons in new e-bikes, but even more in electric conversion. Many folks want to keep riding a bike that they already have, but need a little help getting up our Vermont hills, or hauling kids, groceries, etc. The GMP incentive is often the enticement to make the move to electric. This has been a big help in growing our e-bike sector and in maintaining the overall viability of our 85 year old small town Main Street business. Thanks again for your support.
