* * * Rusted Brake Rotors; Safety Inspection * * *

BULLETIN; CONTACT INFORMATION FOR FAILURES

(a) Legislative intent. It is the intent of the General Assembly that:

(2) that the presence of rust on brake rotors, by itself, does not constitute a failure for the purpose of the annual safety inspection required under 23 V.S.A. § 1222 and that the presence of rust that is temporary, also known as surface rust, which sometimes results from the vehicle being parked for a period of time, not be sufficient for a motor vehicle to fail inspection because such rust does not cause diminished braking performance that prevents a motor vehicle from adequately stopping.

(b) Bulletin. The Department of Motor Vehicles shall issue a clarifying administrative bulletin to all inspection mechanics certified by the Commissioner of Motor Vehicles that:

(1) details the rejection criteria for rotors and drums in the Periodic Inspection Manual;

(2) explains the difference between surface rust and rust that is considerable for purposes of determining if the rejection criteria are met, which requires that the existing rust be “a condition of any swelling, delamination, or pitting”; and

(3) provides information that an inspection mechanic shall provide to the owner of a vehicle that fails inspection because of rusting on rotors and drums.

(c) Contact information. The Department of Motor Vehicles shall include

how to contact the Department of Motor Vehicles with questions about the annual safety inspection and the Periodic Inspection Manual on all notices of failure issued by inspection mechanics certified by the Commissioner of Motor Vehicles.

* * * License Plates for Plug-In Electric Vehicles * * *

Sec. 48. LICENSE PLATES FOR PLUG-IN ELECTRIC VEHICLES;
FINDINGS

The General Assembly finds that:

(1) Plug-in electric vehicles (PEVs), which include plug-in hybrid electric vehicles and battery electric vehicles, provide new and unique challenges for first responders and firefighters when responding to the scene of a crash that may involve a PEV.

(2) PEVs are powered by high-voltage batteries, which means that if a PEV is involved in a crash resulting in a fire or in the need for extrication or rescue, or a combination of these, then fire and rescue personnel must invoke special operations to suppress the fire or initiate the extrication or rescue operation.

(3) Other states and countries have begun noting whether or not a motor vehicle is a PEV with a designation on the vehicle's license plate.

(4) First responders and firefighters in Vermont will be in a better position to safely respond to a fire, extrication, or rescue involving a motor vehicle crash if they know whether one or more vehicles involved are a PEV, which can be done, in most instances, with a license plate designation.
