

My name is Luisa benitez Moreno, i work on a dairy farm and I earn a wage way below the states minimum wage.

I ask you all to listen to us, our stories and petitions. I am a single mother of 2 who I have to support by myself and depend on my wages.

When I think about the future, I think about their schools and studies and with the money that I earn it won't be enough.

I been on this farm for 10 yrs, throughout this time i have trained many people, despite doing all this work, we have no benefits, our wages don't go up, and on top i have to work 12 hrs straight, no paid vacations or sick day, if we get sick we don't get paid for that.

This is why it's really important to you all to hear us and not take our stories lightly
