

VERMONT STATE MUSHROOM

BY CHARLES & GEORGE
PELTON

WE THINK THE BEAR'S HEAD TOOTH SHOULD BE THE VERMONT STATE MUSHROOM BECAUSE...

- It can be used as medicine.
- It can be found locally.
- It is in the mushroom family *hericium americanum*.

HOW DO WE KNOW THIS?

- Representative Bos-Lun visited Windham elementary school.
- We voted on different mushrooms. First, we voted by a voice vote and then voted with hand vote.

The mushroom that won is the Bear's Head Tooth mushroom!

THESE ARE THE MUSHROOMS WE PICKED FOR VOTING.

- Shrimp of the woods
- Hedgehog mushroom.
- Hen of the woods.
- Coral mushroom
- Lobster mushroom.
- Lions mane mushroom
- Bear's head tooth mushroom.
- Chicken of the woods.
