Labor Market Area (LMA) Data and Scores

LMA scores represent the combined scores of the county subdivisions comprising the LMA. This approach combines county subdivision scores using a weighted average based on the population of each county subdivision. The data table starting in column H lists the county subdivisions that comprise each LMA and their scores. The data table below depicts the LMA scores which are ranked in 5% increment tiers; the top 25% of LMAs receive a priority score between 5 (highest) and 1 (lowest). The remaining 75% of communities receive a 0.
