

AGROFORESTRY: THE MANAGEMENT of Trees, Crops and Livestock

JUAN P. ALVEZ (PH.D.)

jalvez@uvm.edu

Research Associate Faculty Grazing Research Coordinator

WHAT IS AGROFORESTRY?

Is the intentional integration and management of trees and shrubs into crop and animal farming systems to create environmental, economic, and social benefits.

(USDA)

Is an agricultural practice of integrating and managing trees and shrubs into crop and animal farming systems to create environmental, economic, and social benefits.

(Own twist)

COMMON TYPES OF AGROFORESTRY SYSTEMS

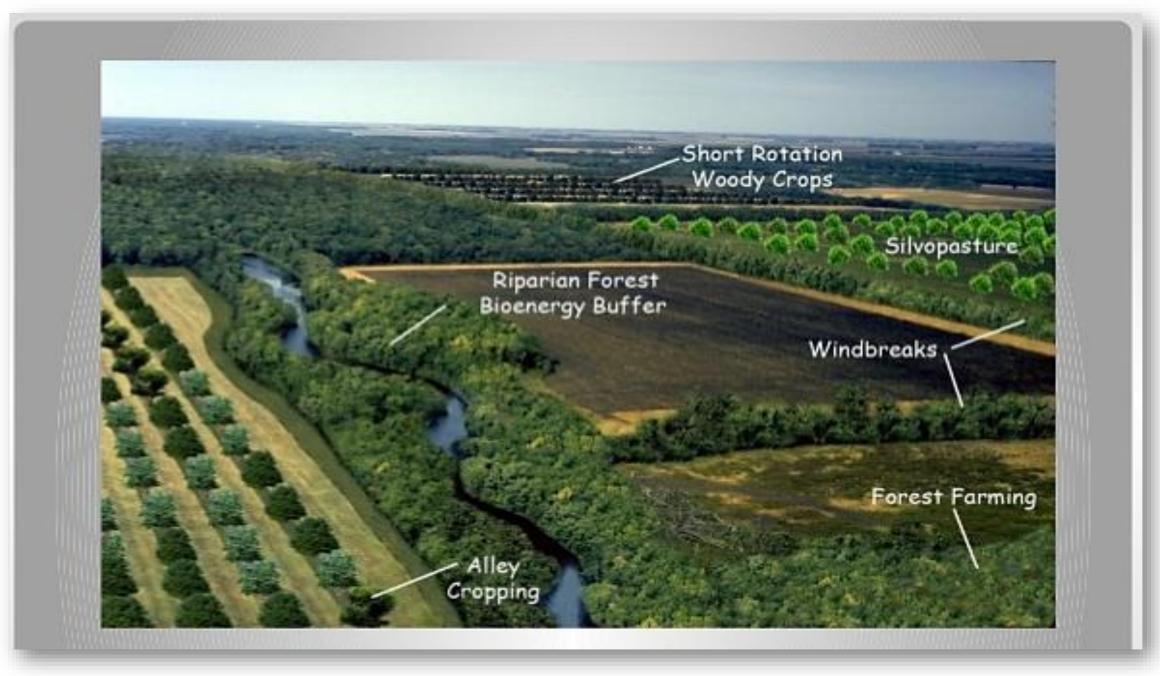

Timber and

Non Tiber Forest Products

COWS IN THE WOODS...

(NOT SILVOPASTURE!)

THE FARM TO PLATE AGROFORESTRY PRIORITY STRATEGY TEAM

- Helped to support collaboration among farmers, educators and service providers
- Partnered w/ the Agroforestry Storytelling and Mapping Project
- Developed an Agroforestry Species List
- Foster collaborative learning in VT

LOOKING FORWARD – Future and expansion of agroforestry in VT

- Continue to support education on agroforestry systems
- Nursery capacity
- Processing and storage facilities
- Viability analysis
- Assess research needs
