

Dear Congresspeople:

I'm writing to ask that you extend Section 248 for one year to give us the time to address these very important issues that are being brought up.

I support the creation of a stakeholding group of DPS, PUC, VCE, and AT&T to work on updating the PUC process and the recommended changes in Section 248a.

Please be aware of the new findings of harm to human health, the animals, insects and plants that has been shown by, among others, the extensive NH Report, We have, thus far, no protective legislation for these big telecom corporations.

Please care about your world.

Thank you.
