

To the board of the House & Environment Committee,

CTIA, the wireless industry lobbying group, will be coming on strong opposing any changes to Section 248a, this should not be allowed. Changes to Section 248a is how we, the people, are heard! I am a landowner of the Enosburg epuc Case # 22-2120, and may have to be forced to move my family due to this tower potentially being built right next our home we recently bought and invested renovations on. We would never have bought our home in this quiet countryside neighborhood were there a tower right next to the property and if this project goes through it will depreciate our property value significantly.

When I first learned about this proposal for a 153 foot lattice radio tower about a year ago, I was one of a small handful of people who were notified of its application because I am an adjoining landowner to the man who is leasing his land to this company, ITW. There was a tiny ad in the end of the classifieds of a small news agency with its latitude and longitude coordinates on it and that was basically all they had to do to inform the general public. Now, the general public believes a smattering of misunderstandings that this company has been able to achieve due to its lack of transparency and publication. With changes made to Section 248a, we believe this, among other major points may be corrected!

Thank you,
Pippa Dorfman
