

Resilience Implementation Strategy

Near Term April – November 2024

Assess the alignment vs. gaps of existing plans, programs, policies, and funding*

Assess the vulnerability to human and natural communities, infrastructure, and the economy

Collect data on disasters, threats, hazards, and future risks

Identify gaps

Medium Term September 2024 – February 2025

Identify metrics for tracking progress on climate resilience*

Establish statewide climate resilience priorities informed by Vermonters

Categorize and prioritize gaps

Long Term March – July 2025

Understand the costs

Recommend changes to existing programs, processes, and policies in order to close gaps

**These actions aligns with current and planned work in the Climate Action Office*
