# Climate Action Office (CAO)

Statewide climate action requires a **long-term intergovernmental structure**.

To accomplish this, the CAO works collaboratively within the Agency of Natural Resources and across state Agencies to **lead, coordinate, and track climate action** across state government, which support the goals and requirements of the Global Warming Solutions Act.

**provides expertise and capacity** on state-led climate initiatives.

CAO staff are experienced in greenhouse gas mitigation, adaptation and resilience, carbon sequestration and storage, communications, and data analysis.

**monitors, assesses, and tracks** climate actions.

enhance **public access to** influencing climate action, and **public understanding** of these actions.

This work strives to center frontline and impacted communities and is done in close collaboration with Environmental Justice and Civil Rights Unit (ANR Secretary's Office).

# Municipal Vulnerability Index

**Mapping tool to help municipalities understand and explore their vulnerabilities to climate change.**

- **Social/Community** (e.g., demographic factors, municipal staff capacity, distance from emergency services and shelters)
- **Economic/Jobs** (e.g., unemployment rate, income, key economic sectors)
- **Built/Physical Environment** (e.g., transportation, utilities, mobile homes, impervious surfaces)
- **Natural Environment** (e.g., stream protection, critical habitat, air quality)
- **Natural Hazards** (e.g., flooding, extreme temperatures, drought)
