Subject: Bill H.463

I hope I am not too late to put my 2 cents in on the importance of this bill. I am a person who has lost my sight throughout my life where I am totally blind. Based upon my lived experience, it is very important to have an ADA point person, such as an ADA Coordinator at the Legislature. Municipalities require one as the result of the ADA. The Legislature being so large, while encouraging Vermonters to participate at "Our House", would help us with a disability have a specific person to contact with ADA related issues.

Sincerely,

Charlie Murphy
