

People Waiting in Vermont Emergency Departments for Mental Health Placement Week of March 27, 2023

VAHHS is collecting point-in-time data on patients stuck in emergency departments waiting transfer or discharge to mental health care—also called patient boarding. This data collection effort is a work in progress and may change over time as we refine data points or streamline collection efforts. This point-in-time data is collated and shared with the Department of Mental Health, hospital representatives, and other interested parties.

The VAHHS data collection process is described below:

FREQUENCY— Hospitals report manually to VAHHS on patients awaiting placement as of each Monday and Thursday morning.

SCOPE— The scope of this report includes all patients waiting for mental health care in Vermont emergency rooms. Data are collected on all patients waiting, regardless of legal status or insurance.

STRUCTURE— Hospitals report person-level data to VAHHS for comparison with DMH counts. Person-level records include age, legal status, Medicaid status, and reason for wait so data discrepancies with DMH can be identified easier.

COMPARISON WITH DMH – The scope of data that VAHHS is collecting is more expansive than the data reported to DMH, as VAHHS is collecting data on all patients regardless of legal status and reason for waiting. Data differences in DMH counts and VAHHS counts of patients waiting is driven by voluntary patients and/or patients waiting for community placements not being reported to DMH.

Data excludes days where reporting from hospitals fell below 70% or days where the University of Vermont Medical Center was not able to make a report. Figures are point-in-time and cannot be summed together to arrive at a total number of individuals or episodes. Averages represent averages of daily reports in each month. Most patients waiting for care are in the emergency department, however a small number of hospitals place patients on medical surgical floors while waiting transfer to inpatient psychiatric units. These patients are included in our numbers as they are still boarding.

*Total ED beds used as a denominator for this measure represents dedicated ED rooms. However, during times of high-volume hospitals may expand ED treatment space into adjacent departments and hallway spaces which are not included in the denominator for this measure.
