

Hello Peggy,

I would like to testify against Judge Kirstin Schoonover from continuing to practice as a judge. She was the judge 5 years back for my child custody case. The attitude and trauma from her continues to give me nightmares. Mrs Schoonover had told me it was "my fault for going off and getting married and that I am not allowed to move or reside anywhere except in Vermont" when I married my now husband and not my daughters father. Her attitude towards me was atrocious and nor did she care to listen to my story and mental abuse that I had put up with my daughters father and yet this lady blamed me for everything. I hope the state takes this into consideration as I believe she should not be allowed to practice as a judge.

Thank you
Shilpa Saini
