2023 Vermont Tax Expenditures Report

Introduction

The 2023 Vermont Tax Expenditures Report is an updated catalogue of all exemptions, exclusions, deductions, credits, preferential rates, and deferrals of liability applicable to the State's major tax sources as defined in 32 V.S.A. § 312. The report also provides an estimate of the fiscal effect for each tax expenditure. 2023 marks the eighteenth year of tax expenditure reporting in Vermont. This report reflects recent research and recommended best practices.¹

Tax expenditures are statutory provisions that reduce the amount of revenue that would otherwise be collected to encourage a particular activity or limit the amount of taxes collected from certain persons. Tax expenditures have essentially the same fiscal effect as direct government appropriations. Most states publish tax expenditure reports on a regular basis to increase transparency and clarify what public policy choices are being made through the tax code.

The Legislature has codified statutory purposes for each tax expenditure and defined tax expenditures for reporting requirements. Four categories of items are not considered tax expenditures:

1. revenue outside the taxing power of the State;
2. provisions outside the normal structure of a particular tax;
3. revenue foregone as unduly burdensome to administer; and
4. those excluded for the purpose of avoiding government taxing itself.

This report encompasses tax expenditures to the taxes that represent the majority of the State's annual tax revenue, including:

1. Major income taxes: individual and corporate;
2. Major sales taxes: sales and use, meals and rooms, and purchase and use;
3. Property taxes;
4. Alternative business taxes: bank franchise and insurance premiums; and
5. Transportation excise taxes: gasoline, diesel fuel, and motor vehicle purchase and use.

Vermont has additional tax sources that raise smaller amounts of revenue, however these sources are not included in the report.

The estimates in this report are for the cost of providing a particular tax expenditure in a fiscal year. These costs are estimated without regard to the interaction with other provisions in the tax code, implementation issues, or other considerations. Therefore, these values are not a substitute for a more detailed analysis of the revenue gain that would result from the elimination or modification of one of these expenditures in the legislative context.

Of note, biannually, a separate tax expenditure review report is published that includes a more extensive analysis of specific tax expenditures, as required by Section 40 of Act 134 of 2016. Included in the analysis are expedited reviews that briefly analyze the purpose of a tax expenditure, delineate its cost and benefits, and consider whether it meets its intended policy goal. Additionally, the analysis includes a full review(s) of certain tax expenditures to provide a more in-depth economic and fiscal analysis, as well as to provide policy makers with recommendations on how to

improve or modify the expenditure to achieve stated legislative goals. The 2023 tax expenditure review includes analysis of tax expenditures related to promoting income security and encouraging work; exempting necessities of life, including health care, from taxation; and implementing State tax policy and other priorities. The Joint Fiscal Office (JFO) completed the reviews with data assistance and legal analysis as needed from the Vermont Department of Taxes.

Organization of the Report

The report is divided into sections according to tax type with the descriptive list of tax expenditures, including statutory reference, date of enactment, estimated foregone revenue, statutory purpose, and a brief description. At the beginning of each section is a summary of the expenditures and multiple year data as well as cost projections for the upcoming budget year.

Brief Definitions of the Various Tax Bases

Individual and Corporate Income Tax

Prior to Tax Year 2018, Vermont personal income taxes were linked to the federal tax structure and the State used federal taxable income as the starting point for calculating both personal and corporate state income taxes. Beginning in Tax Year 2018, the starting point for calculating personal income taxes is federal Adjusted Gross Income. Subtractions from this starting point (Vermont Standard Deduction, Personal Exemption) are Vermont-specific. Corporate income taxes remain linked to federal corporate taxable income.

The value of an income tax expenditure differs depending on where in the income tax calculation it occurs. The value depends on:

1. whether it is a deduction or exclusion from taxable income,
2. a reduction of the Vermont tax prior to applying the income adjustment,
3. income that is exempt and part of the adjustment calculation, or
4. a credit against tax, which may be refundable or nonrefundable.

Sales and Use Tax

Generally, the base of the sales and use tax is final retail sale of tangible personal property. Vermont adopted a definition² of “retail sale” developed by a consortium of states as part of the Streamlined Sales and Use Tax Agreement. With some exceptions, this is the tax base for the sales and use tax. Estimating expenditures in sales and use taxes presents different challenges because Vermont does not require the collection of data on items exempted from sales. Therefore, the tax expenditure estimates contained in this report are based on data from a variety of sources for different years and use different methodologies. For data sources that do not have annual updates, the data are adjusted for inflation.

Meals and Rooms Tax

The tax on meals³ and rooms was enacted in 1959. The tax on alcoholic beverages was added in 1963. Unlike the sales tax chapter of Title 32, the meals and rooms tax does not contain an exemption statute. Most of the exemptions or exclusions are found in definitions of the tax base.

² Included in 32 V.S.A. § 9701(5)

³ The definition of “taxable meal” was substantially rewritten in 1993.

Similar to the sales tax, there are some challenges estimating tax expenditures for the meals and rooms tax, as such, the same methodology is used for estimating these expenditures.

Property Tax

Education property taxes, while collected by the municipalities, are considered state revenue, and associated expenditures are included in this report. Vermont has two state tax rates that apply to the assessed value of both homestead and nonhomestead property respectively. Homestead property means a principal dwelling and land; nonresidential property is generally all other property and specifically excludes most personal property. For the purposes of this report, a property tax expenditure is almost always a total exemption from tax or an adjustment to the value of the property that results in a lower tax. The tax expenditures in the enumerated list are organized according to type; ordinary exemptions; adjustments to property values; session law exemptions; and property taxed under alternate schemes.

Bank Franchise Tax

Financial institutions doing business in Vermont are taxed on the average monthly deposits held in Vermont by the corporation. There are two categories of tax expenditures reported: deposits in State-chartered credit unions that are not subject to the tax, and expenditures that include tax credits. Credits can be awarded to financial institutions for direct investment or, in the case of the downtown and village center tax credits, indirect bank credit certificates.

Insurance Premiums Tax

Insurance companies doing business in Vermont are taxed on the premiums and assessments written on business in the State. Certain organizations are exempt from paying the insurance premiums tax. There are also some Vermont tax credits available to insurance companies to offset tax liability.

Gasoline and Diesel Taxes

The Department of Motor Vehicles (DMV) has a gross figure for the number of tax-exempt gallons of gasoline and diesel sold in Vermont. The tax expenditure estimates are derived by using data from several sources to estimate the quantity of dealer-to-dealer sales and the quantity of diesel fuel purchases by State, local government entities and public transit agencies. These are parsed out from the total provided by DMV.

Motor Vehicle Purchase and Use Tax

The purchase and use tax is based on the value of a vehicle less the value of a vehicle traded. The Department of Motor Vehicles (DMV) database includes transactions exempted in seven categories and contains information on the vehicle type, make, model, and year, but not the sales price. The expenditure estimate is derived by multiplying the number of transactions in each category by the average tax paid per taxable transaction. There is also an estimate based on a sample of transactions of the additional tax revenue if there was no trade-in allowance. The Joint Fiscal Office and the Vermont Department of Taxes have made estimates based on the best data available for each of the tax types.

List of Fiscal Year 2021 Individual Income Tax Expenditures

1.000 Adjustments to Taxable Income

1.001 Vermont Standard Deduction

Statute: 32 V.S.A. § 5811(21)(C)(ii)-(iii)
 Enacted: 2018
 Estimate: \$ 149,150,000
 # Taxpayers: 358,309

Statutory Purpose: Not listed in statute

Each individual income tax return in Vermont is entitled to take a standard deduction equal to \$12,700 for a married couple, \$6,350 for a single filer, and \$9,500 for a head of household in tax year 2023. An additional \$1,000 is deduction can be taken for taxpayers over the age of 65 or blind taxpayers.

Prior to 2018, because the starting point for Vermont personal income taxes was federal taxable income, the federal standard deduction flowed through to Vermont. Previous tax expenditure reports catalogued this as a federal flow-through expenditure. After 2018, the expenditure was largely the same, however, it was a Vermont-specific deduction rather than a federal flow-through.

1.002 Vermont Personal Exemptions

Statute: 32 V.S.A. § 5811(21)(C)(i)
 Enacted: 2018
 Estimate: \$ 122,065,000
 # Taxpayers: 336,654

Statutory Purpose: Not listed in statute

Vermont allows each individual tax return to take \$4,250 per person in personal exemptions for the taxpayer, spouse, and each qualifying dependent.

Prior to 2018, because the starting point for Vermont personal income taxes was federal taxable income, the federal standard deduction flowed through to Vermont. Previous tax expenditure reports catalogued this as a federal flow-through expenditure. After 2018, the expenditure was largely the same, however, it was a Vermont-specific deduction rather than a federal flow-through.

1.003 Vermont Municipal Bond Income Exemption

Statute: 32 V.S.A. § 5811(21)(A)(i)
 Enacted: 1986
 Estimate: \$ 1,670,000
 # Taxpayers: 5,642

Statutory Purpose: 32 V.S.A. § 5813(a)

The statutory purpose of the exemption for Vermont municipal bond income in subdivision 5811(21)(A)(i) of this title is to lower the cost of borrowing in order to finance State and municipal projects.

Interest income from Vermont State and local government obligations is exempt from taxation in Vermont. However, interest income from non-Vermont State and local obligations is added to AGI when calculating the Vermont Taxable Income.

1.004 Capital Gains Exclusion

Statute: 32 V.S.A. § 5811(21)(B)(ii)
 Enacted: 2002; amended 2009, 2010
 Estimate: \$ 23,663,000
 # Taxpayers: 58,523

Statutory Purpose: 32 V.S.A. § 5813(b)

The statutory purpose of the Vermont flat capital gains exclusion in subdivision 5811(21)(B)(ii) of this title is intended to increase savings and investment by making the effective tax rate on capital gains income lower than the effective tax rate on earned income while exempting a portion of the gain that may represent inflation. The 40 percent business capital gains exclusion mitigates the impact of one-time realizations in a progressive tax structure.

Taxpayers may reduce taxable income by up to \$5,000 in adjusted net capital gain income or 40% adjusted net capital gain income from the sale of certain business assets held for more than three years. The exclusion amount cannot exceed 40% of federal taxable income. Beginning tax year 2019, the 40% exclusion is limited to \$875,000 worth of capital gains.

1.005 Social Security Exemption

Statute: 32 V.S.A. § 5811(21)(B)(iv)
 Enacted: 2018
 Estimate: \$ 6,186,000
 # Taxpayers: 28,335

Statutory Purpose: 32 V.S.A. § 5813(w)

The statutory purpose of the partial exemption of federally taxable benefits under the Social Security Act in section 5830e of this title is to lessen the tax burden on Vermonters with low to moderate income who derive part of their income from Social Security benefits.

A taxpayer's Social Security benefits are permitted to be excluded from their taxable income depending upon their income. 100% of Social Security benefits are exempt for a single taxpayer with adjusted gross income (AGI) of less than \$50,000 and a married couple with AGI less than \$65,000. The benefit is phased out over the next \$10,000 such that single taxpayers with AGI above \$60,000 and married couples with AGI above \$75,000 receive no exemption.⁴ Prior to 2022, these income thresholds were \$45,000 for single filers and \$60,000 for married couples.

⁴ The income thresholds for the Social Security Exemption were increased by \$5,000 in Act 138 of 2022. Social Security benefits receive a full exemption for single taxpayers with AGI below \$50,000 and \$65,000 for married taxpayers. The phase out continues over the next \$10,000 from the new thresholds. The updated threshold will take effect in tax year 2022.

1.006 Vermont Medical Deduction

Statute: 32 V.S.A. § 5811(21)(C)(iv)
Enacted: 2019
Estimate: \$ 4,396,000
Taxpayers: 2,350

Statutory Purpose: Not listed in statute

The medical deduction allows Vermont taxpayers to deduct the amount of their itemized medical and dental expenses taken at the federal level beyond the Vermont standard deduction and personal exemptions. Entrance and monthly fees to continuing care retirement communities are not eligible for the deduction.

Congress suspended federal charters because of the unmerited public assumption that the charter signifies federal approval of the organization's activities. (CRS Report, April 8, 2004) There are two main groups of congressionally chartered organizations, including veterans, fraternal or patriotic groups such as the American Red Cross, National Academy of Sciences, or Girl and Boy Scouts, and corporate entities such as the Federal Reserve Bank, Fannie Mae, Freddie Mac, and the Tennessee Valley Authority.

Statutory Purpose: None

Fixed equipment, including ski lifts and snowmaking equipment is exempt. This estimate does not include \$550,000 in foregone revenues (or PILOT payments made to towns) for ski lifts and snowmaking equipment at two resorts. That is because leases with the State of Vermont put title to that property in the State's name, which would mean that if this exemption were removed that equipment would still not be taxable by the State. The tax expenditure estimate here represents the portion municipalities retain to fund improvements in the TIF district. The percentage varies by district but is usually between 70% and 100% of new property tax increment. The remaining portion is required by law to be remitted to the Education Fund.

⁵ Special thanks to Joint Fiscal Office Senior Analyst Chris Rupe for estimating the tax expenditures in the Motor Fuel and Purchase and Use Tax Expenditure Summary.

Description of Gasoline and Diesel Fuel and Motor Vehicle Purchase and Use Tax Expenditures

No. 160 (2010), Sec. 1 amended 32 V.S.A. §312 to add reporting on the gasoline tax, diesel fuel tax and motor vehicle purchase and use tax to the biennial tax expenditure report.

Gasoline Tax

There are no end user exemptions to the gasoline tax.

Diesel Fuel Tax and Transportation Infrastructure Bond (TIB) Fund Diesel Fuel Assessment

23 V.S.A. §3003 imposes on the sale of diesel fuel:

- (1) a tax of \$0.28 per gallon,
- (2) a petroleum distributor license fee of \$0.01 per gallon which is deposited in the petroleum cleanup fund, and
- (3) a transportation infrastructure bond (TIB) fund assessment of \$0.03 per gallon. This analysis treats exemptions from the tax, fee and assessment as all being tax expenditures and herein the term “tax” is all inclusive.

As specified in 23 V.S.A. §3003(d)(1), the following uses are exempted from the diesel fuel tax, the license fee and TIB assessment:

- off road uses for agricultural purposes
- use by a vehicle registered as a farm truck
- off road uses by any vehicle
- uses by state or municipal entities (including school districts, fire districts)
- use by a non-profit public transit agency

Diesel fuel purchases by government entities and public transit agencies are excluded from this analysis.

The Department of Motor Vehicles (DMV) database is limited to information on the number of taxable and tax-exempt gallons sold and does not break down the aggregate numbers by user type. Therefore, this report does not estimate the tax expenditure value of the individual exemptions but instead provides one aggregate estimate for all the exemptions in 23 V.S.A. §3003(d)(1). The DMV database of diesel transactions was reconfigured mid-FY 2020, which necessitated a change in estimate methodology for the 2023 report. The tax expenditure estimates for years prior to FY2021 are derived by using data from several sources to estimate the quantity of diesel fuel purchases by state and local government entities and public transit agencies, which are not considered to be tax expenditures. These totals were then subtracted from DMV’s gross figure for tax-exempt gallons. Estimates for FY 2021 and future years are derived from querying the new DMV system to exclude tax exempt diesel used by the Agency of Transportation (AOT), nonprofit transit agencies, and other government entities (where identifiable).

Motor Vehicle Purchase and Use Tax

Motor Vehicle Purchase & Use (P&U) Tax – Specific Exemptions

Exemptions from the P&U tax are specified in 32 V.S.A §8911. The exemption for state and local government entities is excluded from the analysis.

The DMV database includes transactions exempted from the P&U tax in 7 categories. Information is available on the vehicle type, make, model and year, but not the sales price. The expenditure estimate is derived by multiplying the number of transactions in each category by an estimate of the average P&U tax paid per taxable transaction.

Motor Vehicle Purchase & Use Tax – Trade-In Value Exemption

32 V.S.A §8902(4) and (5) define the purchase price subject to the P&U tax as, in general terms, being equal to the gross price paid minus the value of any trade-in involved in the transaction (broadly defined to include separate sales). It has been argued that a trade-in allowance constitutes a tax expenditure. It has also been argued that a trade-in allowance taxes the true net cost of the vehicle sale transaction and is necessary to avoid double taxation. In 2005, at the request of the House Ways & Means Committee, the Joint Fiscal Office provided revenue estimates for several options involving the elimination of the trade-in allowance, in whole or in part. The figures were an estimate of the additional P&U tax revenue that would have been generated had the trade-in allowance not existed in the fiscal year involved (adjusted for estimated demand effects). The estimate for a zero trade-in allowance was updated and is included in this report. Whether this revenue constitutes a tax expenditure or rather double taxation is a separate question.
