Personal Income Tax and the Six Principles

Six Principles

- 1. Sustainability/Reliability
- 2. Fairness
- 3. Simplicity
- 4. Economic Competitiveness
- 5. Tax Neutrality
- 6. Accountability

Source: https://www.ncsl.org/research/fiscal-policy/principles-of-a-high-quality-state-revenue-system.aspx#principles

- 1. Sustainability/Reliability
 - Sustainability The income tax is known to be more volatile
 - Individual income can be impacted by general economic conditions
 - Susceptible to one-time high-income events, such as sale of a business
 - Greater progressivity in tax code could mean greater volatility
 - Reliability demographics impact the long-term trajectory of the income tax base
 - Aging population and a shrinking working age population; retirees have lower incomes
 - Greater income inequality = greater share of tax receipts from a smaller number of high-income filers
 - Linkages to the Federal Tax Code

2. Fairness

- Vermont's Personal Income Tax is progressive = promotes Vertical Equity
 - High income taxpayers pay a larger portion of their income
- According to ITEP, one of the most progressive in the country
- 3. Simplicity
 - Removing Deductions, Credits, and Exemptions would make the code simpler, but maybe at the expense of fairness
 - Complexity from several different areas
 - Definitions/calculation of income what is in, what is out?
 - Rate Schedule should certain income be taxed at different rates?
 - Policy decisions deductions, credits, and exemptions

- 4. Economic Competitiveness
 - Complexity of income tax makes it difficult to compare across states
 - Rates, definition, and brackets are different
 - In general, Vermont has lower effective rates than most of New England, but the effective rates increase steeply after \$100,000
 - Above \$150,000, Vermont has one of the highest effective rates.

5. Tax Neutrality

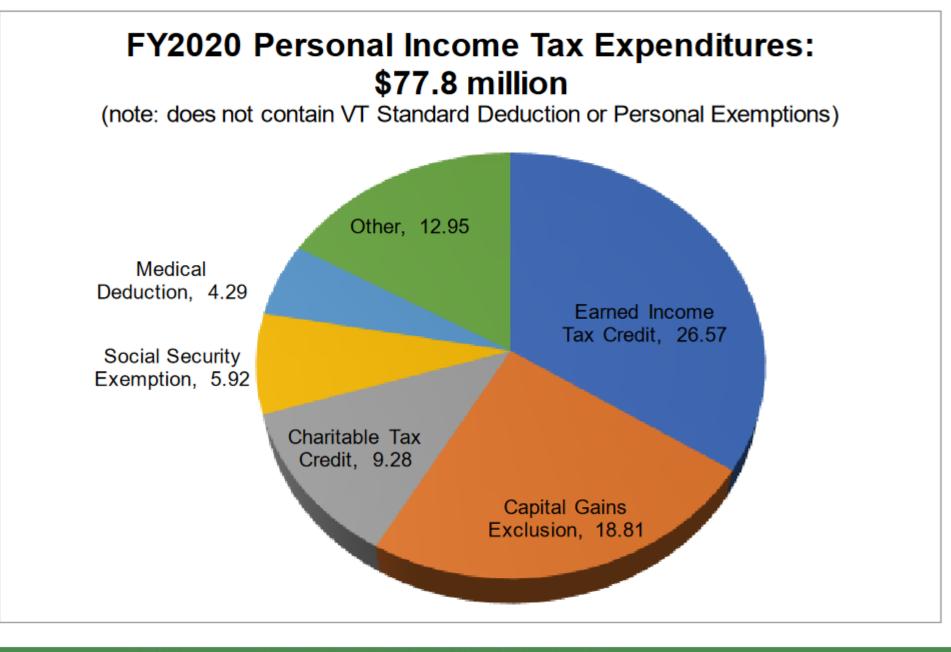

- Vermont includes some incentives through the Personal Income Tax code to promote certain behaviors
 - Investment/Savings: capital gains exclusion, investment and research and development tax credit, 529 tax credit
 - Charitable tax credit
 - Limited to 5% on the first \$20,000 of donations different from the Federal deduction

6. Accountability

- Vermont Tax Expenditure Report published every 2 years
 - This year's will be out on January 17th
 - Aside from the personal exemption and standard deduction, Vermont had 24 income tax expenditures that cost \$77.8 Million in 2020
 - Annually, JFO and Tax publish reviews select tax expenditures and provides considerations for legislators.
 - Of note, in Act 138 of 2022 the General Assembly passed the Child Tax Credit estimated to cost \$32 Million
 - Other costs: CDCC, Student Loan, Military Retirement, Social Security are another \$8+ Million
