

"Greetings Everyone On The Government operation committee Members"

My Name is Matthew Lawrence LeFluer From Alburgh Vermont in Grand Isle County of Vermont And I Support S-55 As A solution for permanent hybrid Virtual Options Opportunity For Town municipalities Across Vermont Statewide I'm A Member of the ( Vermont Democratic Disability caucus) VDDC And Member of ( Vermont Legends of Cities And Towns Equity committee Member) VLCT And A Important Member of Vermont Healthcare Advisory team member Statewide.

Sorry this tells you about how many organizations I have joined and this is just a little on the list have not yet fully disclosed every single organization I join within Vermont's organization Statewide.

But the reason why I support S-55 is for equity diversity inclusion acceptance and transparency a sense of belonging for individuals that are like myself of color communities of color, low income families, veterans, senior citizens, individuals with disabilities, deserve much better and have a right to participate under the American with Disability Act the ADA Federal law of the land.

I hope you also considered Ted Brady From VLCT That is proposal to also make a funding mechanism finance mechanism to support towns and cities without Virtual Technology options and have opportunity to provide them those technology opportunity options to support them and their technology upgrade so they can participate within Vermont Statewide for tell me in days government operations etc everyone has a right to participate in his or her way of looking at the big picture we as individuals need to collaborate together as a whole so we all can survive in Vermont Rural climate there's a saying ("nothing about us without us") from the veteran senior citizens and individuals with disability movement across Vermont Statewide

As to closing my testimony as We work And collaborate together we bring efficiency and effectiveness positive economics for everyone in Vermont regardless it's a win-win scenario Outlook for everyone to participate let's collaborate and do this work together.

Sincerely Matthew Lawrence LeFluer From Alburgh Vermont.
