

As CMO at Grace Cottage Hospital in Townshend, I am very aware of the many administrative burdens placed on our primary care providers, taking time away from their patients. These burdens also contribute to provider burnout and reduces the time they spend with their families. H.766, as I'm sure you are aware, is a step to help reduce these burdens significantly. I hope you will support this bill. Please feel free to call me with any questions.

In appreciation for all you do to help all Vermonters,

George
