Senator Ginny Lyons, Chair
Senate Committee on Health Care
Vermont State House
115 State Street
Montpelier, VT 05633

Dear Chair Lyons and Members of the Senate Committee on Health Care,

The Northern New England Clinical Oncology Society (NNECOS) and the Association for Clinical Oncology (ASCO) are pleased to support H. 766, which establishes guardrails around prior authorization and step therapy processes in the state.

NNECOS is a professional organization whose mission is to promote the highest quality care for patients with cancer and blood disorders in Maine, New Hampshire, and Vermont. NNECOS members are a community of hematologists, oncologists, and other healthcare professionals who specialize in cancer care. ASCO is a national organization representing physicians who care for people with cancer. With nearly 50,000 members, our core mission is to ensure that cancer patients have meaningful access to high quality, equitable cancer care.

Prior authorization requires patients or their providers to secure pre-approval as a condition of payment or insurance coverage of services. In a recent ASCO survey, 80% of respondents said that a patient has experienced significant impacts on their health, such as disease progress, because of prior authorization processes. The most common harms to patients include delays in treatment (95%) and diagnostic imaging (94%), patients being forced onto second-choice therapy (93%) or denied therapy (87%) and increased out-of-pocket costs (88%). These survey responses confirm that prior authorization results in unnecessary delays or denials of cancer care.

NNECOS and ASCO are committed to supporting policies that reduce cost while preserving quality of cancer care; however, it is critical that such policies be developed and implemented in a way that does not undermine patient access. Payer utilization management approaches like prior authorization are of particular concern because they represent greater likelihood of raising barriers to appropriate care for individuals with cancer.

NNECOS and ASCO are pleased that H. 766:

- **Ensures timely access to care** by requiring insurers to respond to a prior authorization request within two business days for nonurgent circumstances and within 24 hours if the request is urgent; and
- **Promotes continuity of care** by stipulating that prior authorization for a healthcare service must remain valid for either the course of treatment or a year.

This bill also addresses step therapy or fail first policies, which can be particularly problematic for patients with cancer because they can significantly delay a patient's access to the best treatment available for their condition. While waiting to complete a "step," a patient with cancer may experience disease progression and irreversible damage to their overall health.

NNECOS and ASCO are pleased that H. 766 would place guardrails around step therapy by requiring carriers to grant an exception to a step therapy protocol if:

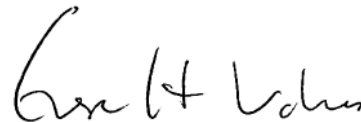

- The drug required to be used is contraindicated or will cause an adverse reaction;
- The drug required to be used is expected to be ineffective based on the known clinical characteristics of the patient and the known characteristics of the prescription drug regimen;
- The patient has already tried a prescription drug that was discontinued by the prescriber due to lack of efficacy or an adverse event;
- The required drug is not in the best interest of the patient; or
- The patient is stable on a prescription drug selected by their clinician.

NNECOS and ASCO are encouraged by the steps H. 766 takes toward improving prior authorization and step therapy processes, and we welcome the opportunity to be a resource for you. For a more detailed understanding of our policy recommendations on this issue, we invite you to read the [ASCO Position Statement: Prior Authorization](#) and the [ASCO Position Statement: Utilization Management](#). Please contact Sarah Lanford at ASCO at Sarah.Lanford@asco.org if you have any questions or if we can be of assistance.

Sincerely,

Carl Nelson, MD
President
Northern New England Clinical Oncology Society

Everett Vokes, MD, FASCO
Chair of the Board
Association for Clinical Oncology
