

Good morning.

I would like to express my support for the availability of STI prevention for minors. As you know, minors are already able to consent to treatment for STIs. Unfortunately, without providing preventive services, minors are still at risk for contracting STIs and dealing with the psychological and social impacts of those diagnoses. There are numerous preventive services that are available to prevent STIs, and it would be extremely beneficial for minors to have access to those services. Please support the bill to expand minors' access to prevention and treatment of STIs.

Sincerely,

Jessie Leyse, MD, MPH
